Hello, everybody! I am pleased by the current development in the photography industry. The big boys have showed their mirrorless cameras and now even the small players are also in the game with Panasonic entering the elite club as well. Cameras has never been this advanced since they were made more than a century ago and it ' s amazing what they can do these days.

The EM has no full manual exposure mode capability, but instead was intended to be used by inexperienced photographers who could not easily master the intricacies of shutter speeds and f-stops. There were also significant changes to the EM's mechanical and electrical components to reduce its production cost relative to previous Nikon cameras: dimensional tolerances weren't as tight, there were no ball bearings in the film advance mechanism, and no high-quality titanium shutter.
