"Perhaps to a greater extent than any other army, the German Armed Forces employ military abbreviations on their maps and charts, on task force tables of organization, on direction and location sign posts in combat zones, on field orders, and, in short, in every case where abbreviations may possibly be used. These abbreviations are often used in connection with military symbols (see German Military Symbols, January 1943, Military Intelligence Service). A thorough knowledge of both abbreviations and symbols is therefore essential to military personnel engaged in the interpretation of captured documents."--Page 1.

These eight stories are linked by a date and a motif. All of them have to do with love. Love and its conditions on the night

of March 19, 1929. In his second book and his only collection of stories, Peter Høeg proves himself to be a true storyteller in the tradition of Karen Blixen and Joseph Conrad. These beautifully constructed tales deal with love, the classic arts and sciences, and the confrontation of Western and non-Western cultures. Moving from a railroad car in the Congo to a sailboat in Lisbon's harbor to an upper-class apartment in Copenhagen, they include the tales of a young, disillusioned mathematician who comes face-to-face with his culture's distortion of Africa; an esteemed judge who runs off with the young man he has just sentenced to prison for his homosexual tendencies; and a town--sealed off from the plague--that is infiltrated by a troupe of traveling actors.

configured as a way of activating possibilities for students to exist as subjects. By framing teaching as an act of dissensus, that is, as an interruption of egological ways of being, this book positions teaching at the progressive end of the educational spectrum, where it can be reconnected with the emancipatory ambitions of education. In conversation with the works of Emmanuel Levinas, Paulo Freire, Jacques Rancière, and other theorists, Gert Biesta shows how students' existence as subjects hinges on the creation of existential possibilities, through which students can assert their "grown-up" place in the world. Written for researchers and students in the areas of philosophy of education, educational theory, curriculum theory, teaching, and teacher education, *The Rediscovery of Teaching* demonstrates the important role of teachers and teaching in the project of
