The B-series are a family of inline four-cylinder DOHC automotive engines introduced by Honda in 1988. Sold concurrently with the D-series which were primarily SOHC engines designed for more economical applications, the B-series were a performance option featuring dual overhead cams along with the first application of Honda's VTEC system (available in some models).

The Honda Accord responds readily to tuner modifications and additions. The well-built engine can withstand turbochargers and NOS systems easily. Decreasing the weight or increasing the available torque and horsepower have become standard mods that make use of lighter and higher-strength performance parts for the Honda Accord.
