Features Include: 10 complete sample ACT exams, with full explanations for every answer Updated content matches the new test requirements In-depth explanatory answers for every question Scoring worksheets to help you calculate your total score for every test Free access to additional practice ACT tests online

This “fascinating” (Malcolm Gladwell, New York Times bestselling author of Outliers) examination of literary inventions through the ages, from ancient Mesopotamia to Elena Ferrante, shows how writers have created technical breakthroughs—rivaling scientific inventions—and engineering enhancements to the human heart and mind. Literature is a technology like any other. And the writers we revere—from Homer, Shakespeare, Austen, and others—each made a unique technical breakthrough that can be viewed as both a narrative and neuroscientific advancement. Literature’s great invention was to address problems we could not solve: not how to start a fire or build a boat, but how to live and love; how to maintain courage in the face of death; how to account for the fact that we exist at all. Wonderworks reviews the blueprints for twenty-five of the most significant developments in the history of literature. These inventions can be scientifically shown to alleviate grief, trauma, loneliness, anxiety, numbness, depression, pessimism, and ennui, while sparking creativity, courage, love, empathy, hope, joy, and positive change. They can be found throughout literature—from ancient Chinese lyrics to Shakespeare’s plays, poetry to nursery rhymes and fairy tales, and crime novels to slave narratives. A “refreshing and remarkable” (Jay Parini, author of Borges and Me: An Encounter) exploration of the new literary field of story science, Wonderworks teaches you everything you wish you learned in your English class, and

"contains many instances of critical insight....What's most interesting about this compendium is its understanding of imaginative representation as a technology" (The New York Times).

Provides the essential information needed to pass the Network+ exam. Unique format devotes a two-page spread to every objective on the exam, giving the user ample opportunity to practice for the exam day.

Originally published in 1983, this book presents both the technical and political information necessary to evaluate the emerging threat to world security posed by recent advances in uranium enrichment technology. Uranium enrichment has played a relatively quiet but important role in the history of efforts by a number of nations to acquire nuclear weapons and by a number of others to prevent the proliferation of nuclear weapons. For many years the uranium enrichment industry was dominated by a single method, gaseous diffusion, which was technically complex, extremely capital-intensive, and highly inefficient in its use of energy. As long as this remained true, only the richest and most technically advanced nations could afford to pursue the enrichment route to weapon acquisition. But during the 1970s this situation changed dramatically. Several new and far more accessible enrichment techniques were developed, stimulated largely by the anticipation of a rapidly growing demand for enrichment services by the world-wide nuclear power industry. This proliferation of new techniques, coupled with the subsequent contraction of the commercial market for enriched uranium, has created a situation in which uranium enrichment technology might well become the most important contributor to further nuclear weapon proliferation. Some of the issues addressed in this book are: A technical analysis of the most important enrichment techniques in a form that is relevant to analysis of proliferation risks; A detailed projection of the world demand for uranium enrichment services; A summary and critique of present institutional non-proliferation arrangements in the world enrichment industry, and An identification of the states most likely to pursue the enrichment route to acquisition of nuclear weapons.

This book's strategies and tools help school leaders explore urgent and uncomfortable issues of race, bias, and privilege with their teachers throughout the school year.

Naylor returns to the fictional neighborhood, this time focusing on the men behind the women who inhabited that desolate block of row houses, telling their tragic, sad, funny, and heroic stories.
