"Official publication of the American Occupational Therapy Association".

While family life has conspicuously changed in the past fifty years, it would be a mistake to conclude that family routines and rituals have lost their meaning. In this book Barbara H. Fiese, a clinical and developmental psychologist, examines how the practices of diverse family routines and the meanings created through rituals have evolved to meet the demands of today's busy families. She discusses and integrates various research literatures and draws on her own studies to show how family routines and rituals influence physical and mental health, translate cultural values, and may even be used therapeutically. Looking at a range of family activities from bedtime stories to special holiday meals, Fiese relates such occasions to significant issues including parenting competence, child adjustment, and relational well-being. She concludes by underscoring the importance of flexible approaches to family time to promote healthier families and communities.

Includes section, "Recent book acquisitions" (varies: Recent United States publications) formerly published separately by the U.S. Army Medical Library.

Presenting the new edition of the text that delivers the most widely-used and developed conceptual model in occupational therapy. Beautifully redesigned and fully revised, the Third Edition of A Model of Human Occupation (MOHO) delivers the latest in human occupation research and application to practice. New to this edition: a reader-friendly format with second color and additional illustrations and anecdotes; more case examples for integrating the model into practice; a discussion of the therapy process and how change occurs; language linked to UT and ICDH-2 terminology; a research chapter; and numerous research references highlighting the growing body of evidence supporting MOHO.

Psychiatrie
