The world's bestselling introductory Latin course. Developed by the University of Cambridge School Classics Project, this bestselling Latin program provides an enjoyable and carefully paced introduction to the Latin language, complemented by background information on Roman culture and civilization. Starting in Roman Britain and moving on to imperial Rome itself, Unit 3 focuses on the murderous schemes and machinations of Gaius Salvius Liberalis, as he plots his ruthless and apparently unstoppable rise to power.

This book contains over fifty passages of Latin from 200 BC to AD 900, each with translation and linguistic commentary. It is not intended as an elementary reader (though suitable for university courses), but as an illustrative history of Latin covering more than a millennium, with almost every century represented. Conventional histories cite constructions out of context, whereas this work gives a sense of the period, genre, stylistic aims and idiosyncrasies of specific passages. 'Informal' texts, particularly if they portray talk, reflect linguistic variety and change better than texts adhering to classicising norms. Some of the texts are recent discoveries or little known. Writing tablets are well represented, as are literary and technical texts down to the early medieval period, when striking changes appear. The commentaries identify innovations, discontinuities and phenomena of long duration. Readers will learn much about the diversity and development of Latin.

Thierry Meynard examines how the Jesuits in China came to understand the Confucian tradition, and how they offered the first complete translation of the Lunyu in the West, in the Confucius Sinarum Philosophus (Confucius, the Philosopher of China, 1687).

The core of this book is the life story of a manuscript codex, British Library Royal MS 13 E IV: the Latin Chronicle (from the Creation to 1300) of Guillaume de Nangis, copied in the abbey library of St-

Denis-en-France. The authors shed new light on the production process, identifying the illuminator of the Royal MS and naming the scribe. Detailed evidence links the codex to important events in history, such as the Council of Constance, and famous actors like Jean de France, duc de Berry, Sigismund of Luxembourg, Thomas Howard, duke of Norfolk, and Henry VIII, to name a few. The authors show how it traveled from one capital to the other, narrating the entire life and interesting times of this codex. Another dimension of this study accounts for all twenty-two copies of the Chronicle, now scattered in nine cities from London to Vienna, placing each one in a scrupulously drawn stemma codicum and sketching its history.

This handbook for teachers provides both practical, up-to-date guidance and a theoretical overview on a number of key topics in Latin teaching. Using a wealth of interviews, observations and pupil transcripts, Steven Hunt title utilizes case-study evidence of excellent practice in teaching and learning from a wide variety of institutions: from outreach programmes, community schools and academies in the UK, to New York Charter Schools, KIP schools and schools in Eastern Seaboard states in the USA. Offering practical advice on topics such as essay writing, teaching controversial topics including women, slavery, ethnicity and social hierarchy, making use of primary sources and using ICT to advance language skills, the book also engages with broader questions of approach and theory. These include a survey of the three main approaches to Latin teaching: grammar-translation, communicative and reading approaches; explanation of cognitive and social approaches to learning; and analysis of the differences between intrinsic and extrinsic motivation. Moreover, traditional arguments about the value and purpose of learning Latin at school level are re-examined in the light of current educational thinking and government policy-making. This book is invaluable for trainees, newly qualified teachers and more experienced practitioners
