DEPARTMENT OF DEFENCE

The Allison T56 is a single shaft, modular design military turboprop with a 14-stage axial flow compressor driven by a four-stage turbine. It was originally developed by the Allison Engine Company for the Lockheed C-130 transport entering production in 1954. It is now produced under Rolls-Royce which acquired Allison in 1995. The commercial version is designated 501-D.

Allison T56 | Military Wiki | Fandom

The engine's commercial version, the T56 501-D, is the world-leading large turboprop engine. The T56 is a single shaft, modular design, turboprop engine. The gearbox has two stages of gear reduction, features a propeller brake and is connected to the power section by a torque-meter assembly.

T56 - Rolls-Royce

Allison T56-A-1 In 1951, the U.S. Air Force announced a requirement for a medium-size logistic and tactical transport aircraft, which resulted in the workhorse Lockheed C-130 Hercules. With support of the Air Force, Allison designed the T56 turboprop for the C-130, and first flight-tested the engine in 1954 in the nose of a Boeing B-17 testbed ...

Allison T56-A-1 (501-D13) Turboprop Engine, Cutaway ...

The Allison T56 is an American single-shaft, modular design military turboprop with a 14-stage axial flow compressor driven by a four-stage turbine. It was originally developed by the Allison Engine Company for the Lockheed C-130 Hercules transport entering production in 1954. It has been a Rolls-Royce product since 1995 when Allison was acquired by Rolls-Royce.

Allison T56 - Wikipedia

a particular model of the Allison 501/T56 engine is established on the basis of engineering considerations, user experience, and a careful evaluation of any safety factors involved. Within that time period, however, an engine's individual maintenance requirements are largely deter-mined by the effects of the operating environment upon

TURBO-PROP ENGINESWA AERONAUTICAL RESEARCH LABSMELBOURNE ...

The upgrade allows T56 engines to operate at greatly reduced temperatures, which extends the service life of parts and improves reliability by 22%. In February 2016, Rolls-Royce delivered the first T56 Series 3.5 Engine Upgrade kits to the U.S. Air Force for installation on its C-130H transport fleet.

Rolls-Royce T56 Turboprop Engine | PowerWeb

Allison-manufactured 501/T56 turboprop engines have been used exclusively to power Hercules aircraft from the YC-130 to the aircraft's present configuration, the Advanced C-130H. This is neither happenstance nor merely an artifact of previous practice. It is the consequence of a special, ongoing partnership between two compa-
