The discovery that most of the chronic infections in humans, including the oral, lung, vaginal and foreign body-associated infections, are biofilm-based, has prompted the need to design new and properly focused preventive and therapeutic strategies for these diseases. *Microbial Biofilms: Methods and Protocols* provides a detailed description of the currently available methods and protocols to investigate bacterial and fungal biofilms, exhaustively illustrated and critically annotated in 25 chapters written by authors well known for their experience in the respective fields. The book has joined together microbiologists and specialists in infectious diseases, hygiene and public health involved in exploring different aspects of microbial biofilms as well as in designing new methods and/or developing innovative laboratory protocols. Written in the successful *Methods in Molecular Biology* series format, chapters include introductions to their respective topics, lists of the necessary materials and reagents, step-by-step, readily reproducible protocols and notes on troubleshooting and avoiding known pitfalls. Authoritative and easily accessible, *Microbial Biofilms: Methods and Protocols* presents readers with the most established and validated experimental procedures to investigate microbial biofilms.

In 1985, winemaker Joe Benziger and Sonoma artist Bob Nugent struck on the idea of putting original art on special releases of Imagery Estate wines. The goal was straight-forward: commission the world's modern art luminaries to create works for reproduction onto wine labels. Two decades and 160 labels

later, they have assembled a staggering collection of contemporary art, from the likes of Sol Lewitt, Terry Winters, Nancy Graves, John Baldessari, Judy Pfaff, and Bob Arneson. This book highlights 133 works of art, the best of the Imagery collection. The images are big and lush, and accompanied by biographical sketches of the artists' careers, as well as a short description of their individual ideas and methods. The pictorial index shows the works in their label-form, from 1985 to the most recent vintages. These images are evocations of wine's multi-faceted ability to inspire us.

The Department of Defense (DOD) has relied heavily on the critical skills and capabilities of Explosive Ordnance Disposal (EOD) personnel from each of the four military services to counter threats from improvised explosive devices (IED), a significant cause of fatalities among U.S. troops in Iraq and Afghanistan. EOD personnel have extensive training in the detection, identification, on-site evaluation, making safe, recovery, and final disposal of unexploded explosive ordnance. EOD forces' capabilities in countering the IED threat, including collecting and evaluating captured explosive-related enemy material from the devices, have made these forces integral to successful joint military operations. However, the high demand for the EOD capability has resulted in personnel experiencing numerous deployments. In addition to their function in countering IEDs, EOD personnel are responsible for a wide range of other missions, such as clearing unexploded ordnance from training ranges; providing defense support to civil authorities; and assisting the U.S. Secret Service and Department of State with the protection of the
