PROPAGATION ...

Ground wave propagation of the wave follows the contour of earth. Such a wave is called as direct wave. The wave sometimes bends due to the Earth's magnetic field and gets reflected to the receiver. Such a wave can be termed as reflected wave. The above figure depicts ground wave propagation. The wave when propagates through the Earth's ...

passing radio wave will bend in an ionospheric layer is directly related to the intensity of ionization in that layer, and to the frequency of the radio wave. A triangle may be used to portray the cross-sectional path of ionospheric radio-wave travel, as shown in Fig 1, a highly simplified picture of what happens in propagation of radio waves.
