This practical and engaging book provides a coherent approach to global business responsibility and ethics based on the latest research, theory, and practice. The authors incorporate numerous interesting and current real world examples to support the argument that corporations need to - and can - identify and implement processes that foster ethical conduct, ensure basic human rights, protect the natural environment, and enhance social justice wherever businesses operate around the globe. "Global Business Citizenship" combines elements of political theory, stakeholder relationships, business ethics, corporate social performance, accountability and measurement, and organizational change. Its practical approach encompasses "best practices" in stakeholder management, experiments in applying corporate values to local conditions, and social environmental auditing and reporting. Focusing on the strategic alignment and change management process for implementing business citizenship principles and practices, it is an essential supplement for any course concerned with ethics and social responsibility in today's global business climate.

Bob Tasca is, quite simply, the world's most effective practitioner of customer satisfaction. His accomplishments are

astounding. His small Ford dealership is consistently among the world's best in sales volume, and industry executives from all over often visit in order to learn from his operation. Though he sells a generic product, Tasca has at times achieved the unheard-of feat of capturing 24 percent of his metro market, and he regularly sees 65 percent of his customers return -- triple the loyalty rate of his competitors. In *You Will Be Satisfied*, he reveals how anyone, whether shoe salesman, software company middle manager or bookstore owner, can drive customer loyalty to dizzying heights. In the book's short, punchy chapters, real-life anecdotes and bulleted lessons, readers will find the knowledge and tools they need to send their sales soaring.

This book surveys state-of-the-art research on and developments in lithium-ion batteries for hybrid and electric vehicles. It summarizes their features in terms of performance, cost, service life, management, charging facilities, and safety. Vehicle electrification is now commonly accepted as a means of reducing fossil-fuels consumption and air pollution. At present, every electric vehicle on the road is powered by a lithium-ion battery. Currently, batteries based on lithium-ion technology are ranked first in terms of performance, reliability and safety.

Though other systems, e.g., metal-air, lithium-sulphur, solid state, and aluminium-ion, are now being investigated, the lithium-ion system is likely to dominate for at least the next decade - which is why several manufacturers, e.g., Toyota, Nissan and Tesla, are chiefly focusing on this technology. Providing comprehensive information on lithium-ion batteries, the book includes contributions by the world's leading experts on Li-ion batteries and vehicles.

Annotation. A third volume of essays from various activities and events organized by the Centre for International Borders Research at Queens University of Belfast considers three modes in the analysis of culture and cross-border cooperation--cultures of co-operation, co-operation about culture, and the impact of culture on forms of co-operation--as possible strategies in the comparative social science of European borderlands. The case studies range from Israel's Green Line to Ulster Unionist identity. There is no index. Annotation ©2004 Book News, Inc., Portland, OR (booknews.com).
