Analysis ~~What is discourse analysis: By Prof Muntaz Ali.~~

The eleven studies in this volume illustrate and advance the synthesis of discourse analysis with rhetorical studies. Rhetoric in Detail shows how a variety of techniques from discourse analysis can be useful in studying such concerns as agency, legitimation, controversy, and style, and how concepts from rhetoric including genre and figuration can enrich the work of discourse analysts. The authors' research sites range from government commissions,

political speeches, newspaper reports and letters to interviews and conversations in beauty salons and online. Methodological overviews interspersed throughout survey critical discourse analysis, interactional sociolinguistics, grounded theory, computer-aided corpus analysis, narrative analysis, and participant observation and provide suggestions for further reading. Rhetoric in Detail is an invaluable source for rhetoricians looking for systematic, grounded ways of approaching new, more vernacular sites for rhetorical discourse and for discourse analysts interested in seeing what they can learn from the tradition and practice of rhetorical analysis.

empirical tools of some of the most relevant approaches to the analysis of discourse. It has been mainly conceived of as a general (university) course on Discourse Analysis, but it can also be useful for any person or group whose main concern is to acquire the basic necessary knowledge and skills for analyzing any type of discourse. The subject matter of the book could not only be of use for linguists or prospective linguists: given its interdisciplinary character, its findings can be (and in fact are) used and applied by practitioners and scholars from different fields, such as sociology, psychology, medical science, computer science, and so on. Thus the book can be used by any person who, having certain linguistic knowledge, is interested in exploring the fascinating world of discourse. All the chapters contain both a theoretical and an empirical section, the latter containing examples of analysis, as well as exercises

(Practice) and self-evaluation questions, whose answers can be found at the end of the book (in the Practice key and Key to self-evaluation questions sections). The book is divided into 12 chapters. The first two introduce basic information about discourse analysis and text linguistics, as well as the necessary techniques for gathering data, including a very brief introduction to corpus linguistics. Chapters 3-11 present and discuss some of the most prominent and well-known approaches to discourse analysis, namely Pragmatics, Interactional Sociolinguistics, Conversation Analysis, The Ethnography of Communication, Variation Analysis and Narrative Analysis, Functional Sentence Perspective, Post-Structuralist Theory and Social Theory, Critical Discourse Analysis and Positive Discourse Analysis, and Mediated Discourse Analysis. Finally, Chapter 12 deals with crucial and further issues, such as the

type of discourse chosen for the analysis, the strategies and functions of discourse, or the problem of choosing an appropriate unit of analysis which will suit the aims of research. Perspectives on Discourse Analysis: Theory and Practice may prove of value to all those who are professionally involved in the area of discourse and pragmatic studies, or simply to those who wish to acquire the necessary basic knowledge and techniques for analyzing any type of discourse, from medical, journalistic or political discourse to computer-mediated, humoristic, or hegemonic discourse (where the use and abuse of power is an important issue), just to name a few of the innumerable possibilities. A desirable and intended effect of this book is also the development of an open and tolerant mind, which will eventually lead to a better understanding of the different and varied manifestations of language, culture and communication in

Approaches – The Discourse Studies Reader offers a comprehensive overview of the main currents in discourse studies, both discourse theory and discourse analysis. With short introductions elaborating the broader context, the sections present key selections from a variety of disciplinary backgrounds by placing them into their respective epistemological traditions. The Discourse Studies Reader is an indispensable textbook for students and scholars alike who are interested in discourse theoretical questions and working with discourse analytical methods.

This book approaches cohesion and coherence from a perspective of interaction and collaboration. After a detailed account of various models of cohesion and coherence, the book suggests that it is fruitful to regard cohesion as contributing to coherence, as a

strategy used by communicators to help their fellow communicators create coherence from a text. Throughout the book, the context-sensitive and discourse-specific nature of cohesion is stressed: cohesive relations are created and interpreted in particular texts in particular contexts. By investigating the use of cohesion in four different types of discourse, the study shows that cohesion is not uniform across discourse types. The analysis reveals that written dialogue (computer-mediated discussions) and spoken monologue (prepared speech) make use of similar cohesive strategies as spoken dialogue (conversations): in these contexts the communicators' interaction with their fellow communicators leads to a similar outcome. The book suggests that this is an indication of the communicators' attempt to collaborate towards successful communication.

This book examines how style and intersubjective meanings emerge through language use. It is innovative in theoretical scope and empirical focus. It brings together insights from discourse-functional linguistics, stylistics, and conversation analysis to understand how language resources are used to enact stances in intersubjective space. While there are numerous studies devoted to youth language, the focus has been mainly on face-to-face interaction. Other types of youth interaction, particularly in mediated forms, have received little attention. This book draws on data from four different text types - conversation, e-forums, comics, and teen fiction - to highlight the multidirectional nature of style construction. Indonesia provides a rich context for the study of style and intersubjectivity among youth. In constructing style, Indonesian

urban youth have been moving away from conventions which emphasized hierarchy and uniformity toward new ways of connecting in intersubjective space. This book analyzes how these new ways are realized in different text types. This book makes a valuable addition to sociolinguistic literature on youth and language and an essential reading for those interested in Austronesian sociolinguistics.

This book examines the resources that speakers employ when building conversations. These resources contribute to overall coherence and cohesion, which speakers create and maintain interactively as they build on each other's contributions. The study is cross-linguistic, drawing on parallel corpora of task-oriented dialogues between dyads of native speakers of English and Spanish.

The framework of the investigation is the analysis of speech genres and their staging; the analysis shows that each stage in the dialogues exhibits different thematic, rhetorical, and cohesive relations. The main contributions of the book are: a corpus-based characterization of a spoken genre (task-oriented dialogue); the compilation of a body of analysis tools for generic analysis; application of English-based analyses to Spanish and comparison between the two languages; and a study of the characteristics of each generic stage in task-oriented dialogue.

The use of English as a lingua franca (ELF) on a global scale forces a reassessment of our understanding of the relationships between language, culture and identity in intercultural communication. This book outlines how we might conceive of this relationship in the

Methods in Cognitive Linguistics is an introduction to empirical methodology for language researchers. Intended as a handbook to exploring the empirical dimension of the theoretical questions raised by Cognitive Linguistics, the volume presents guidelines for employing methods from a variety of intersecting disciplines, laying out different ways of gathering empirical evidence. The book is divided into five sections. Methods and Motivations provides the reader with the preliminary background in scientific methodology and statistics. The sections on Corpus and Discourse Analysis, and Sign Language and Gesture describe different ways of investigating

Behavioral Research describes methods for exploring mental representation, simulation semantics, child language development, and the relationships between space and language, and eye movements and cognition. Lastly, Neural Approaches introduces the reader to ERP research and to the computational modeling of language.

Placing failed humor within the broader category of miscommunication and drawing on a range of conversational data, this text represents the first comprehensive study of failed humor. It provides a framework for classifying the types of failure that can occur, examines the strategies used by both speakers and hearers to avoid and manage failure, and highlights the crucial role humor plays in social identity and relationship management.
