Solutions to capital budgeting practice problems. Capital budgeting and cash flows. 1. No. The \$5 million is a sunk cost: whether or not the firm goes ahead with the new product, the \$5 million has been spent. 2. An increase in the rate of depreciation will cause the cash flows from depreciation (the depreciation tax-shield) to become larger in the earlier years of a project's life and smaller in the latter years of its depreciable life.
