Computer Basics
for the Over 50s
In Simple Steps
By Greg ...

A computer is an
electronic
device that
receives input,
stores or

Online Library Computer

processes the
input as per
user
instructions and
provides output
in desired
format.

Computers have
become an
integral part of
our lives
because they can
accomplish easy
tasks repeatedly

Online Library Computer

without getting bored and complex ones repeatedly without committing errors.

Basics of
Computers
Tutorial -
Tutorialspoint

A computer consists of four

Online Library

Computer

major parts: the input, output, CPU (central processing unit), and memory. Input consists of anything you will add into the computer (microphone, keyboard, mouse, scanner), and output is how

Online Library Computer

the computer
gives back to
you (think
screen,
speakers, etc.).
