No other scholar has so deeply influenced the development of international law or shaped the doctrinal debates as Vattel. More than 250 years after its publication, his Law of Nations has remained the most frequently quoted treatise of international law. This volume explores the reasons behind the extraordinary authority of Vattel and analyses its continuing relevance for thinking and understanding contemporary international law.

Das Konzept der Politischen Autorschaft unter sich wandelnden Bedingungen in der Gegenwart. Wie oft haben Feuilleton und Kritiker den Intellektuellen förtot erklärt, wie oft das Ende der gesellschaftsrelevanten Literatur verkündet? Und doch treten gerade auf dem neuerlichen Höhepunkt weltweiter bürgertlicher Protestbewegungen auch Schriftsteller hierzulande wieder verstärkt als engagierte Intellektuelle auf. Sabrina Wagner stellt sich in ihrer Studie dezidiert der häufig formulierten Annahme entgegen, dass mit dem Ende des Kalten Krieges die Figur des intellektuell sowie die politisch engagierte Literatur endgültig verschwunden seien. Wie Autoren zu Beginn des 21. Jahrhunderts als Stichwortgeber, Meinungsführer und Gestalter in der Öffentlichkeit agieren und eine politische Autorschaft entwerfen, zeigt sie am Beispiel von Juli Zeh, Ilija Trojanow und Uwe Tellkamp auf. Die einzelnen Analysen verdeutlichen, wie Schriftsteller heute ihre Rolle als politische Autoren den sich wandelnden Feldbedingungen anpassen. Dabei wird auch sichtbar, dass die jüngeren Gegenwartsautoren das schriftstellerisch-intellektuelle Engagement nicht etwa gänzlich neu erfinden, sondern gezielt auf bestehende Traditionen zurückgreifen.

A number of highly informative books have been written about what is often called the "Armenian Genocide". This book, written by a political scientist, offers a different approach: It doesn't concentrate on the past; it concentrates on the present, and shows how this past event is perceived and discussed today. The idea is that the arguments deployed in this debate, those which allege that what happened amounts to genocide and those which deny this claim reveal something about cognitive structures of present agents, such as the Turkish government, as well as about the meaning and use of the term "genocide". Analyzing current positions and communication on this historical event thereby helps to illuminate present notions of identity, justice and interethnic coexistence.

The first collection of interdisciplinary and comparative studies focusing on diverse interactions among African, Asian, and Oceanic peoples and German colonizers

This book presents Ulrich Beck, one of the world's leading sociologists and social thinkers, as a Pioneer in Cosmopolitan Sociology and Risk Society. His world risk society theory has been confirmed by recent disasters – events that have shaken modern society to the core, signaling the end of an era in which comprehensive insurance could keep us safe. Due to its own successes, modern society now faces failure: while in the past experiments were conducted in a lab, now the whole world is a test bed. Whether nuclear plants, genetically modified organisms, nanotechnology – if any of these experiments went wrong, the consequences would have a global impact and would be irreversible. Beck recommends ignoring the mathematical morality of expert opinions, which seek to identify the level of a given risk by calculating the probability of its occurrence. Instead, man's fear of collapse should offer an opportunity for international cooperation and a cosmopolitan turn in the social sciences.

From the ancient beginnings of Western legal tradition, law has been conceived as traversed by a fundamental tension between power (will) and reason. This volume examines the tension between these two poles, "ratio and voluntas" in modern law. Part I focuses on three instructive phases in the history of the law's ratio. Part II examines the way legal scholarship, especially doctrinal research (legal dogmatics), can and should contribute to the law's coherence. Part III explores the role of constitutional law in managing the tension between law's voluntas and ratio. The final chapter discusses the implications the growth of transnational law may have on the relationship between ratio and voluntas. The study builds on the views of the distinctive features of the ideal-typical mature modern legal system as presented in the author's previous work, *Critical Legal Positivism* (Ashgate 2002).

This book gives a comprehensive yet easily accessible introduction to risk and uncertainty as they have been analysed in sociology and related social sciences. The book draws extensively on the wide array of contemporary social theories of risk and relates these to the many and diverse areas in contemporary society where risk plays an important role. It will be an invaluable for both students and researchers interested in risk in relation to politics, the environment, health, media, science and technology and finance. Written in a clear and accessible language, the book gives a balanced account of the many theoretical approaches taken to the diverse phenomenon of risk, using concrete examples to illustrate abstract points. The book highlights some key themes such as uncertainty and individual responsibility which emerge as common to different theories and fields of study. The book is perfectly suited as an introduction for new students in sociology, political science, anthropology, media studies and health studies.

The progressive convergence of global economic and social structures calls for a rethinking of management practices as they relate to cultural diversity and moral values. A key element for coping with this transformational phenomenon is the Aristotelian concept of Practical Wisdom, which helps us to do the right thing, in the right way, at the right time and for the right reasons. Expert academics and practitioners share their insights into contemporary theories and conventions for ethical decision-making in diverse cultural contexts. About the Editors Martina Stangel-Meseke – professor of business psychology, Christine Boven – professor of intercultural management, Gershon Braun - lecturer of business ethics, André Habisch – professor of economics, Nicolai Scherle – professor of intercultural management and diversity, Frank Ihlenburg – managing partner of a change management consultancy.

Humanity at Risk compares diverse approaches to the theme of global threats using the tools of philosophy, critical theory, and political thought alongside more practical, socio-political observations. By defining the idea of "global risk" more specifically, Editors Innerarity and Solana, and their contributors, believe we can understand how these risks should be evaluated, predicted, and managed within the framework of democratic societies. The goal of this book is to highlight more precisely the necessity, in the face of new global risks, for new governance at a national, European, and global level.
