"How to Write a Thesis can be read with profit by anyone who writes professionally, whether proposals, reports, monographs or a thesis. It is oriented to someone writing a PhD thesis, but has a lot to say about writing in general. It deals with the process of writing rather than detailed content, and is applicable regardless of discipline" SRA "This is the book that all PhD supervisors and their students have been waiting for: the first comprehensive overview of the many different writing practices, and processes, involved in the production of a doctoral thesis. Crammed full of explanations, shortcuts and tips, this book demystifies academic writing in one fell swoop. Everyone who reads it will be massively enabled as a writer." Professor Lynne Pearce, Associate Dean for Postgraduate Teaching, University of Lancaster "Rowena Murray's down-to-earth approach both recognises and relieves some of the agony of writing a PhD. The advice in this book is both practical and motivational; sometimes it's 'PhD-saving' too. By using Rowena Murray's techniques of regular snacking, instead of occasional bingeing, I managed to rescue my PhD from near-death at a time of work overload." Christine Sinclair, Part-time PhD student and lecturer in Educational Development, University of Paisley This book evolved from fifteen years' experience of teaching thesis writing. The contents have been tried and tested with postgraduates and academics. Early chapters explore the ambiguities and subtleties of thesis writing in detail. Later chapters are more compact, listing steps in the writing process. All chapters provide examples to illustrate techniques and activities to progress writing.

Victor Zarnowitz has long been a leader in the study of business cycles, growth, inflation, and forecasting. These papers represent a carefully integrated and up-to-date study of business cycles, reexamining some of his earlier research as well as addressing recent developments in the literature and in history. In part one, Zarnowitz reviews with characteristic insight various theories of the business cycle, including Keynesian and monetary theories as well as more recent rational expectations and real business cycle theories. In doing so, he examines how the business cycle may have changed as the size of government, the exercise of fiscal and monetary policies, the openness of the economy to international forces, and the industrial structure have evolved over time. Emphasizing important research from the 1980s, Zarnowitz discusses in part two various measures of the trends and cycles in economic activity, including output, prices, inventories, investment in residential and nonresidential structures, equipment, and other economic variables. Here the author explores the duration and severity of U.S. business cycles over more than 150 years, and evaluates the ability of macro models to simulate past behavior of the economy. In part three the performance of leading, coincident, and lagging indicators is described and assessed and evidence is presented on the value of their composite measures. Finally, part four offers an analysis of the degree of success of large commercial forecasting firms and of many individual economists in predicting the course of inflation, real growth, unemployment, interest rates, and other key economic variables. Business Cycles is a timely study, certain to become a basic reference for professional forecasters and economists in government, academia, and the business community.

This text begins by linking the ACOTE Accreditation Standards with current practice in chapters for students and educators, and sets the stage with two foundational concepts vital to the study of occupation: flow and culture. It presents a summary of interconnected constructs that define and direct occupational therapy practice. Inside are included: Basic tenets of occupational therapy; Occupational therapy theoretical perspectives; Screening, evaluation, and referral; Formulation and implementation of an intervention plan; Context of service delivery; Context of delivery service; Management of occupational therapy services; Professional ethics, values, and responsibilities; Culture and its role in occupational choice and performance. It also includes student activities at the end of each chapter, as well as on-line material that consists of multiple choice questions, chapter objectives, teacher activities, and PowerPoint slides. Some additional features Include: Examples as viewed and analyzed from multiple perspectives; Evidence-based practice reviews that provide a starting point to have each topic explored in depth; Evaluation of the mastery of application and self-assessment exercises; Integration throughout the text of Occupational Therapy Practice Framework: Domain and Process, Second Edition. The text overall incorporates adult learning theory as its basis to assist in establishing cognitive interest, using the organization format of grouping concepts together to reinforce and facilitate learning.

This is the eBook of the printed book and may not include any media, website access codes, or print supplements that may come packaged with the bound book. Through the presentation of the Ten Fundamental Principles of Personal Finance, this text empowers students with the knowledge they need to successfully make and carry out a plan for their own financial future.

This text emphasizes the financial concepts and tools that are essential for understanding fundamental business decisions taking the stance that business can be viewed as dynamic, integrated system of funds flows which are activated by management decision. The subjects are related to the business systems concept, with creation of shareholder value seen as the ultimate goal of investment, operating and financial decisions. The illustrative examples given are based on a single company in the early chapters, so that the results of the analytical techniques build into a complete picture. This edition places emphasis on modern topics like shareholder value creation, leasing versus owning, cash flow analysis and economic trade-offs.
