The second half of the 20th century and the beginning of the 21st century witnessed important changes in ecology, climate and human behaviour that favoured the development of urban pests. Most alarmingly, urban planners now face the dramatic expansion of urban sprawl, in which city suburbs are growing into the natural habitats of ticks, rodents and other pests. Also, many city managers now erroneously assume that pest-borne diseases are relics of the past. All these changes make timely a new analysis of the direct and indirect effects of present-day urban pests on health. Such an analysis should lead to the development of strategies to manage them and reduce the risk of exposure. To this end, WHO invited international experts in various fields - pests, pest-related diseases and pest management - to provide evidence on which to base policies. These experts identified the public health risk posed by various pests and appropriate measures to prevent and control them. This book presents their conclusions and formulates policy options for all levels of decision-making to manage pests and pest-related diseases in the future. [Ed.]

A conclusion to the best-selling series that includes Halo finds the love between angel Bethany and her mortal boyfriend, Xavier, put to an ultimate test when they marry against Heavenly law and are subjected to punishment by rogue angels who want to darken angelic power in the heavens.

From the National Review to Breitbart, from Fox News to Rush Limbaugh, conservative news is an inescapable feature of modern politics. Since the early days of mass communication, right-wing media producers have blended reporting with commentary, narrating the news of the day from a perspective informed by conservative worldviews and partisanship. News on the Right seeks to initiate a new interdisciplinary field of scholarly research focused on the study of right-wing media and conservative news. Editors Anthony Nadler and A.J. Bauer gather a range of voices, presenting an interdisciplinary investigation into the practices and patterns of meaning-making in the production, circulation, and consumption of conservative news. Traversing journalism, media and communication studies, cultural studies, history, political science, and sociology, this volume utilizes a variety of qualitative and quantitative research methods to elucidate case studies of conservative news cultures in the US and UK. Together, these perspectives show that a fuller understanding of right-wing media and its effects can be reached by treating these phenomena as deeply interwoven into many conservatives' lives and political sensibilities.

The authors provide an overview of the theoretical and historical development of community development in Kenya and other regions of the African continent. Early initiatives in the discipline were targeted at improving the deplorable conditions of the rural poor as well as deprived urban dwellers, particularly, those residing in urban informal settlements. More chapters are dedicated to pointing out the inevitable nexus between community development, and education and literacy. Indeed, education and communication are presented as indispensable tools in addressing the key concerns of community development including poverty eradication, enhanced participation, promotion of gender equality, peace and mutual co-existence, better health and sanitation practices and protection of the environment. Other themes addressed in this book include the benefits resulting from actively engaging the community members in the public policy making process.

Describes and maps the North American oceanic and coastal waters, classifying them into 24 marine ecoregions, according to oceanographic features and geographically distinct assemblages of species. Descriptive profiles of the ecoregions describe their key features, in terms of physical, oceanographic, and biological characteristics, as well as human impacts. The book is intended to provide a framework for collecting and organizing information on these regions, and to encourage a sense of joint responsibility and a collaborative strategic approach to dealing with the challenges of conserving the regions' shared oceans.

The inside track to India's most powerful tycoons The eight business maharajas profiled here are among Asia's most powerful industrial tycoons. Their combined turnover runs into billions of rupees, and between them they employ some 650,000 people, while indirectly affecting the lives of millions more. Sip a cup of tea, drive to work, listen to music, build a house and the chances are that in these and a myriad other ways you are using products that they manufacture or market. By any yardstick, the achievements of these men would rank among the great business stories of our time. How did these men build their enormous empires? What are their management secrets? How did they thrive and prosper even as others failed? What is their vision for the future? Top business writer and industry insider Gita Piramal draws on exhaustive interviews and in-depth research to discover the answers to these and related questions in her profiles of the men who will lead the country's push to become an industrial superpower in the 21st century.

This stylish and elegant sketchbook is great for multi-use with 120 pages.
