print. DNA and Mutations : Mutations are random. Mutations can be beneficial, neutral, or harmful for the organism, but mutations do not "try" to supply what the organism "needs." Factors in the environment may influence the rate of mutation but are not generally thought to influence the direction of mutation.

### ~~Mutations are random~~

12 1 Dna Worksheet Answers - indycarz.com Dna And Mutations Webquest Answers from dna to protien answers idea that information in a cell flows in one direction: DNA is translated into RNA which is then translated into proteins RNA ribonucleic acid; single stranded molecule that is translated from DNA and is "read" in order to make proteins
