A re-examination of the case of Johann Reuchlin, one of the best-known controversies of the 16th century.

The Essence of Managing Henry Mintzberg appreciates that managers are busy people. So he has taken his classic book Managing, done some updating, and distilled its essence into a lean 176 pages of text.

The essence of the book remains the same: what Mintzberg learned from observing twenty-nine managers in settings ranging from a refugee camp to a symphony orchestra. Simply Managing considers the intense dynamics of this job as well as its inescapable conundrums, for example:

- How is anyone supposed to think, let alone think ahead, in this frenetic job?
- Are leaders really more important than managers?
- Where has all the judgment gone?
- Is email destroying management practice?
- How can managers connect when their job disconnects them from what they are managing?

If you read only one book about managing, this should be it!

Diagnostics, or fault finding, is a fundamental part of an automotive technician's work, and as automotive systems become increasingly complex there is a greater need for good diagnostic skills. Advanced Automotive Fault Diagnosis is the only book to treat automotive diagnostics as a science rather than a check-list procedure. Each chapter includes basic principles and examples of a vehicle system followed by the appropriate diagnostic techniques, complete with useful diagrams, flow charts, case studies and self-assessment questions. The book will help new students develop diagnostic skills and help experienced technicians improve even further. This new edition is fully updated to the latest technological developments. Two new chapters have been added – On-board diagnostics and Oscilloscope diagnostics – and the coverage has been matched to the latest curricula of motor vehicle qualifications, including: IMI and C&G Technical Certificates and NVQs; Level 4 diagnostic units; BTEC National and Higher National qualifications from Edexcel; International Motor Vehicle qualifications such as C&G 3905; and ASE certification in the USA.

You won't be able to stop reading once you pick up Dr. John Hall's terrifying account, A New Breed:

Satellite Terrorism in America. Dr. Hall ' s narration is based on true-life events and what you ' ll find will open your eyes to a completely new form of terrorism. Dr. Hall has treated numerous patients who have complained about voices in their heads, eventually being driven to a form of serious psychosis. In his book, he describes his relationship with his significant other, Mallory, a young, attractive woman with a bright future. Upon beginning a new profession, Mallory was suddenly struck down by unexplainable happenings: mind control, surveillance, stalking, and rape. Hall and others sacrificed themselves and their careers to bring her nightmare to an end. What happened to Mallory and what is happening to countless others? Hall ' s supposition is that we are faced with a type of terrorism that is unseen but just as deadly. Our government satellite surveillance systems are a new way for criminals to gain possession not only of our financial lives, but our most precious resource: Our minds. What can we do and who are these individuals who are trying to control the way the think, feel, act and what we do?
