On a 302 (or smaller c.i.d.) blocks, the distributor mount is almost flush with the top of the block (where the intake sits). The water passages are also right at the top of the block (where the heads sit). The image below shows a 302 block. A 351W block is taller. So, the distributor mount is below the block surface where the intake sits.

any cam you put into a 351 will fit in a 302. As far as the firing order, Ford went to the 351 firing order on all 302's some where around 83, with the "marine cam" in the early carb H.O. 5 liters. The cam firing order was made to address vibration problems in the 351, since it worked so well, Ford just moved it down the line into the 302 family.

Debuting in the 1962 model-year, it's reign lasted until the following century--the last Windsor engine rolled off the line for the 2001 Ford Explorer. Boss 302 Cleveland/Windsor small-block hybrid: The Boss 302 engine was a 351 Cleveland cylinder head bolted onto a Windsor short-block, making the first "Clevor" hybrid. Cylinder heads from a Boss 302 have slightly modified coolant passages to allow everything to mate up perfectly.
