In this exciting book Mike Spick shows how the Luftwaffe's leading fighter pilots were able to outscore their allied counterparts so effectively and completely during the Second World War. When the records of the Jagdflieger pilots became available after the war, they were initially greeted with

Incredulity _ the highest claim was for 352 kills, and more than 100 pilots had recorded more than 100 victories. However postwar research proved that these claims had in fact been made in good faith and confirmation had only been given after rigorous checking. To discover the secret of this success, aviation history expert Mike Spick examines the exploits of these aces and sets out the context in which it took place. Every major theater is covered in detail including the conditions peculiar to each: climate, relative numerical and qualitative strengths, the presence or absence of radar and other measures, and the relative merits of the planes being flown. He focuses on the methods and tactics used by individual aces and uses firsthand sources wherever possible to put the reader right alongside the pilot in the cockpit.

In 1939 a new grade in the Iron Cross series was introduced, the Knight's Cross of the Iron Cross (Ritterkreuz des Eisernen

Kreuzes). It was awarded for a variety of reasons, from skilled leadership to a single act of extreme gallantry, and was bestowed across all ranks, grades, and branches of service. As the war progressed, further distinctions were created for bestowal on existing winners, namely Oak-Leaves (Eichenlaub); Oak-Leaves with Swords (Eichenlaub und Schwertern); and Oak-Leaves with Swords and Diamonds (Eichenlaub, Schwerter und Brillanten). This book, the first in a sequence of four, covers winners of the Knights Cross and the Oak-Leaves distinction in the period 1939-40.

Hindenburg: Power, Myth, and the Rise of the Nazis investigates the various political and cultural manifestations of the myth surrounding German Chief of Staff and Reich President Paul von Hindenburg, from the Battle of Tannenberg in 1914 to his death in the 'Third Reich' and beyond. How this little-known General, whose career to normal retirement age had provided no real foretaste of his heroic status, became a national icon and living myth, and what this phenomenon tells us about one of the most crucial periods in German history, is the subject of this book. The book charts the origins of the Hindenburg myth during the First World War, looks at how it survived the revolution, and explains why Hindenburg's name on the ballot mesmerized voters in the presidential elections of 1925 and 1932. The only two

times in German history that the people could elect their head of state directly and secretly, they chose this national icon; Hindenburg even managed to defeat Hitler in 1932, making him the Nazi leader's ultimate arbiter. The book examines the complex role of the Hindenburg myth in fashioning the Führer cult, while also emphasizing its more wide-ranging appeal prior to 1933. The Hindenburg myth, in fact, caught the imagination of an exceptionally broad social and political coalition of Germans, turning it into one of the most potent forces in German politics in a period otherwise characterised by rupture and fragmentation. Crucially, it managed to survive military failures and political disappointments. As the author shows, the mythical narrative was constantly evolving, but the belief in Hindenburg's mythical qualities was more enduring than a narrow application of Weber's model of 'charismatic authority' -- which defines projection as key -- would suggest.

When the Luftwaffe entered World War 2, its nightfighter force was virtually nonexistent thanks to its leader, Reichmarschall Hermann Göring, who boasted that bombs would never fall on Germany. By mid-1940 his folly was evident; the first night fighter wing was hastily formed with Bf 110s. Initially capable of detecting targets by visual acquisition only, the force greatly improved its effectiveness with the creation of the

'Giant Würzburg' radar chain. By the end of 1942, the night fighter force controlled some 389 fighters and had destroyed 1,291 RAF bombers in that year alone. Complete with first-hand accounts and detailed colour illustrations, this book profiles the many variations of night fighters, and the men who made ace flying them.

Family Secrets and the Psychoanalysis of Narrative is the first book to explore the implications of the psychoanalytic theory of the phantom for the study of narrative literature. A phantom is formed when a shameful, unspeakable secret is unwittingly transmitted, through cryptic language and

behavior, transgenerationally from one family member to another. The "haunted" individual to whom the "encrypted" secret is communicated becomes the unwitting medium for someone else's voice--and the result is speech and conduct that appear incongruous or obsessive in a variety of ways. Through close readings of texts by Conrad, Villiers de l'Isle-Adam, Balzac, James, and Poe, Esther Rashkin reveals how shameful secrets, concealed within the unspoken family histories of fictive characters, can be reconstructed from their linguistic traces and can be shown not only to drive the characters' speech and behavior but also to generate their narratives. First articulated by the French psychoanalysts Nicolas Abraham and Maria Torok, the theory of the phantom here represents a radical departure from Freudian, Lacanian, and other psychoanalytic approaches to literary interpretation. In Rashkin's hands, it also provides a response to structuralist and poststructuralist critiques of character analysis, an alternative to deconstructive strategies of reading, and a new vantage point from which to consider problems of intertextuality, "authorship," and the formation and origins of narrative.
