Il presente volume intende affrontare il tema dei contratti internazionali in modo originale, da un lato concentrando l'attenzione sui temi essenziali, la cui comprensione è indispensabile per orientarsi in questa materia, e dall'altro utilizzando un metodo di esposizione, integrato con esempi e casi concreti, che faciliti la comprensione delle problematiche, non prive di complessità, relative alla cosiddetta contrattualistica internazionale. Per quanto riguarda il primo aspetto, l'autore ha cercato di approfondire gli aspetti realmente importanti per capire la materia dei contratti internazionali, tralasciando aspetti più marginali e talvolta anche questioni importanti sotto il profilo teorico, ma di fatto prive di rilevanza concreta. Infatti, lo scopo primario del volume è di mettere il lettore in grado di comprendere a fondo le problematiche dei contratti internazionali e quindi di potersi orientare nella materia, il che non esclude la possibilità di ulteriori approfondimenti su aspetti specifici. Quanto al secondo aspetto, quello del metodo espositivo, ricorrendo ad un linguaggio semplice e il meno « tecnico » possibile, illustrando le questioni critiche con esempi concreti e, infine, utilizzando accorgimenti grafici che facilitino la lettura, è stato realizzato un prodotto editoriale che sia nella massima misura user-friendly, mettendo in primo piano le esigenze del lettore.

The Yearbook Commercial Arbitration continues its longstanding commitment to serving as a primary resource for the international arbitration community with reporting on arbitral awards and court decisions applying the leading arbitration conventions, as well as on arbitration legislation and rules. Volume XLIII (2018) includes: • excerpts of arbitral awards made under the auspices of the International Chamber of Commerce (ICC) and the Milan Chamber of Arbitration (CAM); • notes on new and amended arbitration rules, including references to their online publication; • notes on recent developments in arbitration law and practice in Argentina, Canada, Cape Verde, PR China, Colombia, Costa Rica, Czech Republic, Hungary, Jamaica, Malaysia, Mexico, South Africa, Sudan, United Arab Emirates and Uruguay; • excerpts of 91 court decisions applying the 1958 New York Convention from 21 countries – including, for the first time, a case from the Marshall Islands – all indexed by subject matter and linked to the commentaries on the New York Convention published in the Yearbook, authored by former General Editor and leading expert Prof. Albert Jan van den Berg; • excerpts from other court decisions of interest to the practice of international arbitration; • an extensive Bibliography of recent books and journals on arbitration. The Yearbook is edited by the International Council for Commercial Arbitration (ICCA), the world's leading organization representing practitioners and academics in the field, with the assistance of the Permanent Court of Arbitration, The Hague. It is an essential tool for lawyers, business people and scholars involved in the practice and study of international arbitration.

In force in 70 countries around the world and covering more than two thirds of world trade, the 1980 United Nations Convention on Contracts for the International Sale of Goods (CISG) is considered to be the most successful convention promoting international trade. According to many commentators, this success is due, among others, to the fact that the Convention does not directly impact on the domestic law of the various legal systems, as it applies only to international - as opposed to purely domestic - contracts. The Convention, in other words, does not impose changes in the domestic law, which makes it easier for States to adopt the Convention. This does not mean, however, that the Convention does not have any impact on the domestic law at all. This book analyzes - through 24 country reports as well as a general report submitted to the 1st Intermediate Congress of the International Academy of Comparative Law held in November 2008 in Mexico City - to what extent the Convention de facto influences domestic legal systems. In particular, the book examines the Convention's impact on the practice of law, the style of court decisions as well as the domestic legislation in the area of contract law.

With the ever-increasing interconnection between markets, businesses and individuals from all over the globe, professionals are asked to develop a greater interest in the international implications of contracts. This book focuses attention on the distribution agreement, one of the most widely used contractual schemes in the practice of international exchanges, providing a analysis and information on the issues that should be considered by the practitioner when drafting, interpreting or executing an international agreement. Issues relating to the choice of the governing law, the competent court, the validity or invalidity of some clauses, the impact that the language of the contract may have, as well as the different meaning and scope of application of some principles, such as good faith and le estoppel, are analyzed from a transnational perspective, highlighting how the same issue can be regulated differently depending on the regulatory framework that governs it. In this second edition, the distribution relationship has been evaluated mainly across the legal systems of the European Union, the United States and Latin America, while not missing references to other regulatory frameworks, which are highlighted in correspondence with particular issues.

The United Nations Convention on Contracts for the International Sale of Goods (CISG) came into force in 1980 and has been ratified and adopted by over 50 of the world's major trading nations. This landmark Convention has set the tone for the harmonization of international law and by its widespread acceptance spurred progress in the harmonization of laws in other areas. Scholars and practitioners from around the world have written extensively on the development and impact of the CISG while courts and arbitral tribunals have issued opinions and judgements based on articles of the Convention. Because of this growing body of information, a need arose for a reference work that would provide easy access to this subject. For the past 20 years Professor Michael Will has been recognized as compiling the most definitive bibliography of books and articles on the CISG as well as a comprehensive digest of all cases related to the CISG. Now that the Convention for the International Sale of Goods is reaching its twentieth anniversary and the number of writings on the CISG exceeds 2,000 items and case law and arbitral decisions number over 200, the time is opportune to publish Professor Will's important reference work for wider dissemination.

La monografía analiza los pactos y contratos celebrados entre las sociedades interesadas en fusionarse. Se abordan tanto los vínculos legales precontractuales, como la amplia gama de contratos preparatorios que pueden concluir las partes hasta llegar al propio contrato de fusión. La obra estudia en toda su extensión el fenómeno contractual que constituye la fusión de sociedades, desde el proceso de formación del denominado "contrato de fusión" (negociaciones y acuerdos preparatorios) hasta el contenido y efectos del negocio final y su posible interacción conflictiva con la normativa societaria. Partiendo de un detenid análisis de la caracterización jurídica de fusión y las operaciones de modificación estructural, se propone una novedosa concepción sobre el modo en que se constituye el vínculo jurídico entre las partes, analizándose multiplicidad de cuestiones como la ruptura de la negociación antes y después del comienzo del procedimiento establecido por la normativa societaria, el desistimiento unilateral después de transcurridas las etapas allí establecidas, el valor de los distintos pactos alcanzados entre las partes y el de las posibles cláusulas penales pactadas, o el rol de los administradores durante el proceso y su eventual responsabilidad. La obra reconoce la estructura compleja de estos problemas e incorpora al análisis las aportaciones metodológicas y sustantivas del moderno Derecho de contratos europeo, al tiempo que toma nota de las características particulares de las técnicas de diseño contractual y su tendencia hacia la estandarización sobre la base de modelos de origen angloamericano.
