Middle School Integer Projects Give middle school students the opportunity to engage with integers through assigning projects involving timelines, money, calories or cube-building. As students apply integers to tangible goods or to real-world circumstances, the once- abstract mathematical concepts will become second nature.

Middle School Integer Projects | Synonym
According to the commutative property of integers, if a and b are two integers, then: a + b = b + a; a x b = b x a; Examples: 3 + 8 = 8 + 3 = 11. 3 x 8 = 8 x 3 = 24. But for subtraction and division, commutative property do not obey. Associative Property. As per the associative property , if a, b and c are integers, then: a+(b+c) = (a+b)+c; ax(bxc) = (axb)xc

Here, integers are added or subtracted first and then multiplied or multiply first with each number within the bracket and then added or subtracted. This can be represented for any integers x, y and z as: ? x x (y + z) = x x y + x x z. ? x x (y ? z) = x x y ? x x z. Example 8: ?5 (2 + 1) = ?15 = (?5 x 2) + (?5 x 1)
