Nakama 1 is a complete, flexible introductory program designed to present the fundamentals of the Japanese language to college students. Presented in two parts, Nakama 1a and Nakama 1b, the program focuses on proficiency-based language learning, emphasizes practical communication and student interaction, and fosters the development of all four language skills and cultural awareness. Thematically organized chapters focus on high-frequency communicative situations and introduce students to the Japanese language and its three writing systems: hiragana, katakana, and kanji. Maintaining the program's balanced approach, the new edition features updated technology resources, new authentic art, and practical, contemporary vocabulary to enhance both teaching and learning. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.

Those aren't stars, darling That's your nervous system Nanna didn't take you to planetariums like this --from "Hyper-Berceuse: 3 A.M." August Kleinzahler's new poems stretch and go places he has never gone before: they have his signature high color and rhythmic jump, but they take on a breadth of voice and achieve registers that his earlier work only hinted at. Ranging from Vegas and Mayfair to the Asian steppes and contemporary Berlin, these poems touch down at will in tableaux where Liberace unceremoniously meets with St. Kevin and Attila with Zsa Zsa Gabor. Surprise after surprise, nothing seems to lie outside Kleinzahler's purview. This is the strongest collection to date from a poet with "the vision and confident skill to make American poetry new" (Clive Wilmer, The Times [London]).

New edition of a standard college textbook.

Hapgood's tour de force is back in print! This riveting account of how earth's poles have flipped positions many times is the culmination of Hapgood's extensive research of Antarctica, ancient maps and the geological record. This amazing book discusses the various pole shifts in earth's history -- occurring when earth's crust slips in the inner core -- and gives evidence for each one. It also predicts future pole shifts: a planetary alignment will cause the next one on 5 May 2000! Packed with illustrations, this book is the reference other books on the subject cite over and over again. With millennium madness in full swing, this is just the book to generate even more excitement at the unknown possibilities.

The Business Law Concentrate is written and designed to help you succeed. Written by experts and covering all key topics, Concentrate guides help focus your revision and maximise your exam performance. Each guide includes revision tips, advice on how to achieve extra marks, and a thorough and focused breakdown of the key topics and cases. Revision guides you can rely on: trusted by lecturers, loved by students... I have always used OUP revision and Q&A books and genuinely believe they have helped me get better grades" - Anthony Poole, law student, Swansea University "The detail in this revision textbook is phenomenal and is just what is needed to push your exam preparation to the next level." - Stephanie Lomas, law student, University of Central Lancashire "It is a little more in-depth than other revision guides, and also has clear diagrams and teaches ways to obtain extra marks. These features make it unique" - Godwin Tan, law student, University College London "The concentrate revision guides stand out against other revision guides" - Renae Haynes Williams, law student, Bangor University "The exam style questions are brilliant and the series is very detailed, prepares you well" - Frances Easton, law student, University of Birmingham "The accompanying website for Concentrate is the most impressive I've come across" - Alice Munnely, law student, Kings College London "-it is a fantastic book. It covers absolutely all topics you need for the course." - Emma McGeorge, law student, Strathclyde University

Has this Caffarelli finally met his match? Millionaire playboy Raoul Caffarelli has always lived life in the fast lane. But when an accident confines him to a wheelchair—and to the care of a woman whose beauty taunts him—he's consumed with rage and frustration. Used to difficult patients, physical therapist Lily Archer won't be cowed by Raoul's arrogance or distracted by his Adonis-like physique. Carrying her own scars from the past, Lily has vowed never to relinquish her power to a man again. Both underestimate the power of the shared passion between them. Their physical scars may heal, but some wounds run much deeper....

In the wake of 9/11 the threat of biological terrorism and sabotage has been thrust to the forefront of public consciousness. However, this is far from being a new phenomenon. From World War II onwards, the Cold War powers devoted considerable resources to developing what became known in the military as µbugs and gas'. This groundbreaking study lifts the lid on the top-secret Department 12 of Directorate 5 (Special Operations) v the elite inner core of the KGB First Chief Directorate and its successor, the Russian Foreign Intelligence Service. During the 1980s and early 1990s the department encouraged biological espionage, the planning and preparation of biological terrorism and acts of sabotage. Their work was carried out primarily through µillegals' v intelligence operatives who were secretly deployed to the West and covertly operated there, masquerading as citizens of Western countries under assumed names and cover stories. One of its top operatives, Alexander Kouzminov, has decided to break his silence and reveal in depth for the first time the department's tasks, plans and tactics. More disturbingly, he explores what others in the West and the developing world are and could be capable of. In this remarkable book we learn the secrets of the USSR's elite intelligence operatives v secrets which could prove vital in maintaining international security in today's uncertain political climate.
