mode power supply (LCD/LED TV) it is very important to check the status of the standby voltage. If you open the LED/LCD television and disconnect both the main board and the inverter board if they are separate, you will notice that only one outlet will have a voltage and the rest will be zero. This voltage is usually 5Vdc and is called the standby voltage, if this 5 volts standby is not generated means the SMPS is defective and therefore you should not continue ...
