This book, first published in 2003, provides a comprehensive and structured vocabulary for all levels of undergraduate Spanish courses. It offers a broad coverage of the concrete and abstract vocabulary relating to the physical, cultural, social, commercial and political environment, as well as exposure to commonly encountered technical vocabulary. The accompanying exercises for private study and classroom use are designed to promote precision and awareness of nuance and register, develop good dictionary use, and encourage effective learning. The book includes both Iberian and Latin American vocabulary, and clearly identifies differences between the two varieties. • Consists of twenty units each treating a different area of

human experience • Units are divided into three levels which allows core vocabulary in each area to be learned first, and more specialised or complex terms to be added at later stages • Vocabulary is presented in alphabetical order for ease of location.

Written for those with a basic competence in Spanish, this comprehensive synonyms guide is designed to help the learner find the right word for the right context - thus improving their vocabulary and enabling them to communicate more precisely and fluently. It contains around 900 lists of synonyms, each one classified according to its level of formality. Every synonym is illustrated with authentic examples, and the subtle shades of difference between them are clearly explained. The book contains four clear indexes: Spanish-Spanish, Argentinean-Spanish, Mexican-Spanish and English-Spanish, enabling the reader to instantly locate any word. This second edition has been thoroughly revised and updated, and includes new material on Argentinean and Mexican varieties, including a useful comparison of Mexican and Iberian Spanish. It will continue to be an essential reference for college and undergraduate students, their teachers, and other language professionals seeking a clear, user-friendly guide to Spanish synonyms and their usage.

Effectiveness. Efficiency. Excellence. These words and concepts permeate current literature, courses, and discussions. They are defined in nearly as many different ways as the number of people who write and talk about them. For practical purposes, the definitions seem to boil down to these:- Effectiveness - doing the right things.- Efficiency - doing things right.- Excellence - efficiently meeting effective goals, both short term and long range. We believe that this book can help you improve the effectiveness, efficiency and excellence of your system for managing loss control ... and for quality, production and cost control. In essence, it can help improve your management system. Improved quality, production and cost control go hand-in-hand with improved loss control, and they all depend on how the system is managed. The idea that excellence in safety and production go hand in hand is not new. As early as 1928 the American Engineering Council, based on an engineering and statistical study, demonstrated that an organization with decreasing injury rates is eleven times more likely to show increased production than an "unsafe" one. We believe that the book's concepts, practices, techniques and tools reflect what leading organizations around the free world have done, and are doing, to get their results. Spanning more than three decades, we have had the good fortune to work with tens of thousands of leaders in hundreds of organizations to distill the contents of this book. The ideas and applications are tried, tested, and proven. Put them to work and they will work for you.

This volume hopes to act as a catalyst for some new and exciting areas of enquiry in the more “ liminal ”

interstices of Irish Studies, Traveller Studies, Romani Studies and Diaspora and Migration Studies. These disciplines are all relatively new areas of enquiry in modern Ireland, a country whose society has witnessed very rapid and wide-ranging cultural and demographic change within the short space of a decade. The issue of multiculturalism is not one which is particularly new to Irish society as a number of contributors to this volume point out. What is new however is an increased acknowledgement of diversity and multiculturalism in Ireland and Europe as a whole. Such an acknowledgement makes increased dialogue between “ mainstream ” society, older minorities such as the Irish Travellers and the many newer immigrant communities such as the Roma all the more necessary. For such constructive dialogue to take place it is vital that migratory peoples and their particular expressions of postcolonial identity be voiced and valued. These identities are both complex and diverse and frequently straddle a number of countries and national identities. It is hoped that this volume will go some way towards the cultivation of such dialogue.
