Introduction to Time Series Analysis and Forecasting presents the time series analysis branch of applied statistics as the underlying methodology for developing practical forecasts, and it also bridges the gap between theory and practice by equipping readers with the tools needed to analyze time-oriented data and construct useful, short- to medium-term, statistically based forecasts. Seven easy-to-follow chapters provide intuitive explanations and in-depth coverage of key forecasting topics, including: Regression-based methods, heuristic smoothing methods, and general time series models Basic statistical tools used in analyzing time series data Metrics for evaluating forecast errors and methods for evaluating and tracking forecasting performance over time Cross-section and time series regression data, least squares and maximum likelihood model fitting, model adequacy checking, prediction intervals, and weighted and generalized least squares Exponential smoothing techniques for time series with polynomial components and seasonal data Forecasting and prediction interval construction with a discussion on transfer function models as well as intervention modeling and analysis Multivariate time series problems, ARCH and GARCH models, and combinations of forecasts The ARIMA model approach with a discussion on how to identify and fit these models for non-seasonal and seasonal time series The intricate role of computer software in successful time series analysis is acknowledged with the use of Minitab, JMP, and SAS software applications, which illustrate how the methods are implemented in practice. An extensive FTP site is available for readers to obtain data sets, Microsoft Office PowerPoint slides,

"My name is Elizabeth Walker. I died at the ripe old age of thirty-eight, after a long battle with cancer. I wanted to make forty. I loved cappuccinos, sunshine and life." So speaks the spirit of Elizabeth watching her love ones from heaven, marveling at the fact she survived. There's sadness when she feels the grief of husband Mike and teen daughters Sasha and Lucy. Each trying to deal with a devastating loss. Yet, life goes on, often painfully. Years pass, the children grow and Mike moves on, while Elizabeth makes her way in the afterlife. The colourful and sassy former hooker, Rita, introduces Elizabeth to the dark lower levels where she learns to rescue lost souls and bring them to the light. High school friend Emma shows her where astral travelers hang out, a white sandy beach they believe is paradise. A coffee shop becomes a focal meeting point, a place for Elizabeth to enjoy her favourite, cappuccinos. Learning the hard way that there's more to her spiritual world than she ever imagined, she wished her short life had been different, regrets become painful. The years do nothing to diminish her love for Mike and her girls

The lessons of good and evil, karma and predestination, having to let go of loved ones and move on, and the possibility of reincarnation await.
