Unicorn Coloring Book For Kids Age 4-8! 100 completely unique unicorn coloring pages for kids ages 4-8! Unicorns are so much fun to color because they lead such interesting, magical lives! They meet princesses, dragons and mermaids. They visit castles and enchanted woodlands, fly through stars and rainbow skies and even wind up in the Land of Sweets! Share the fun and magic of unicorns with a special child! This coloring book is a great non-screen activity to stimulate a child's creativity and imagination. It makes a perfect gift! About this unicorn coloring book: - Contains 100 completely unique coloring pages. There are NO duplicate images in this book.- The pages are single-sided to prevent bleed-through, and so that pages can be removed and displayed without losing an image on the back.- We have carefully designed each page to be entertaining and suitable for children in the 4 to 8 year-old age range. We have avoided overly-intricate designs as well as overly-simplistic ones. We believe children of this age love coloring fun scenes that fire up their imaginations, not a book full of simple shapes.- The pages are a nice, large 8.5x11 size

This book comprises chapters featuring a state of the art of research on digital technology in mathematics education. The chapters are extended versions of a selection of papers from the Proceedings of the 13th International Conference on Technology in Mathematics Teaching (ICTMT-13), which was held in Lyon, France, from July 3rd to 6th. ICTMT-13 gathered together over one hundred participants from twenty countries sharing research and empirical results on the topical issues of technology and its potential to improve mathematics teaching and learning. The chapters are organised into 4 themed parts, namely assessment in mathematics education and technology, which was the main focus of the conference, innovative technology and approaches to mathematics education, teacher education and professional development toward the technology use, and mathematics teaching and learning experiences with technology. In 13 chapters contained in the book, prominent mathematics educators from all over the world present the most recent theoretical and practical advances on these themes This book is of particular interest to researchers, teachers, teacher educators and other actors interested in digital technology in mathematics education.

This book is a concise and lucid introduction to computer oriented numerical methods with well-chosen graphical illustrations that give an insight into the mechanism of various methods. The book develops computational algorithms for solving non-linear algebraic equation, sets of linear equations, curve-fitting, integration, differentiation, and solving ordinary differential equations. **OUTSTANDING FEATURES**

- Elementary presentation of numerical methods using computers for solving a variety of problems for students who have only basic level knowledge of mathematics.
- Geometrical illustrations used to explain how numerical algorithms are evolved.
- Emphasis on implementation of numerical algorithm on computers.

- Detailed discussion of IEEE standard for representing floating point numbers.
- Algorithms derived and presented using a simple English based structured language.
- Truncation and rounding errors in numerical calculations explained.
- Each chapter starts with learning goals and all methods illustrated with numerical examples.
- Appendix gives pointers to open source libraries for numerical computation.

Everyone Succeeds is the story of Torquay Academy, where head Steve Margetts has employed the Leadership Matters principles to turn round a failing school into one of the most improved in SW England in just three years.

The 1st International Conference on Tourism, Management and Technology is motivated by improving the quality of research and development relating to tourism, management and technology fields. Thus, this conference has aims: (1) to bring together the scientists, researchers and practitioners, and lecturers. (2) To share and to discuss theoretical and practical knowledge about innovation in tourism, management and technology fields. The conference took place in Universiti Kuala Lumpur, Malaysia, on August, 17th 2019. There are 34 papers that are participated from various topics. The conference involves tourism, management and technology fields, such as; Media and Technology in Tourism, Innovation in Tourism, The Theoretical Perspective on Tourism, Sustainable Tourism, Gender and Diversity Issue in Tourism, Technology and Management on Tourism, Law in Tourism, Health Tourism, Tourism Policy and Planning, Tourism and Environment, Finance in Tourism. Specifically, this conference can be used as a scientific forum for accommodating discussion among young researchers that originated from Indonesia in the field of Tourism, Management and Technology. Therefore, the invited speakers in this conference are the researchers that are well-known and reputable in the world. We would like to thank the organizing committee and the members of reviewers for their kind assistance in reviewing the papers. We would also extend our best gratitude to keynote speakers for their invaluable contribution and worthwhile ideas shared in the conference. Furthermore, ICTMT is hoped to be able to be used as academic media to exchange ideas and as a result it will succeed in deciding the recommendation related to the tourism, management and technology phenomenon.

This study guide helps prepare students for all five key subject areas of the GED: writing, reading, social studies, math, and science, and offers information on new topics, such as space study, business documents, and number grids. Also included: - Two full-length practice tests modeled on the official GED test-plus a free online test! - Answer keys with helpful explanations - Complete information covering the GED application process and what to expect on the exam

Seeing her as more than just a friend would drive my heart wild, she is special to me in every way let's call her Jana she has no idea what she makes me feel inside. I have known her a little over two years but feels like forever even when we talk every day and it's not like we haven't planned to see each other again it has been in my mind to finally be in love with a woman and she's the closest to my heart for years. Jana and I have the same thoughts also beliefs of a happy couple, no she's never been with another woman, so this is my chance to show her the love I feel but take it slowly and thoughtful as possible. I believe Jana can be happy with the right person as though it might be scary at first but what woman isn't when they go for someone new? This is my story of how my happiness to Jana Johnson was worth it. My name is Angel Knight and I'll be guiding you to beginning and end.

This clear and lively introduction to probability theory concentrates on the results that are the most useful for applications, including combinatorial probability and Markov chains. Concise and focused, it is designed for a one-semester introductory course in probability for students who have some familiarity with basic calculus. Reflecting the author's philosophy that the best way to learn probability is to see it in action, there are more than 350 problems and 200 examples. The examples contain all the old standards such as the birthday problem and Monty Hall, but also include a number of applications not found in other books, from areas as broad ranging as genetics, sports, finance, and inventory management.
