of this topic. Research has demonstrated that ever-increasing numbers of children use digital devices as part of their daily routine. Yet, despite children's frequent use of e-books from an early age, there is a limited understanding regarding how those e-books are actually being used at home and school. As more e-books become available, it is important to examine the educational benefits and limitations of different types of e-books for children. So far, studies on the topic have presented inconsistent findings regarding potential benefits and limitations of e-books for early literacy activities (e.g., independent reading, shared reading). The studies in this book aim to fill such gaps in the literature.

Although many scholars recognize literary similarities between Hosea, Amos, Micah, and Zephaniah, defining the compositional relationship between these texts remains a matter of debate. Following the scholarly trajectory of exploring the compositional relationship between the Twelve prophets, several scholars argue that these four prophetic texts formed a precursory collection to the Book of the Twelve. Yet even among advocates for this 'Book of the Four' there remain differences in defining the form and function of the collection. By reexamining the literary parallels between these texts, Werse shows how different methodological convictions have led to the diverse composition models in the field today. Through careful consideration of emerging insights in the study of deuteronism and scribalism, Werse provides an innovative composition model explaining how these four texts came to function as a collection in the wake of the traumatic destruction of Jerusalem. This volume explores a historic function of these prophetic voices by examining the editorial process that drew them together.
