Impossible Histories is the first critical survey of the extraordinary experiments in the arts that took place in the former Yugoslavia from the country's founding in 1918 to its breakup in 1991. The combination of Austro-Hungarian, French, German, Italian, and Turkish influences gave Yugoslavia's avant-gardes a distinct character unlike those of other Eastern and Central European avant-gardes. Censorship and suppression kept much of the work far from the eyes and ears of the Yugoslav people, while language barriers and the inaccessibility of archives caused it to remain largely unknown to Western scholars. Even at this late stage in the scholarly investigation of the avant-garde, few Westerners have heard of the movements Belgrade surrealism, signalism, Yugo-Dada, and zenitism; the groups Alfa, Exat 51, Gorgona, OHO, and Scipion Nasica Sisters Theater; or the magazines Danas, Red Pilot, Tank, Vekrost, and Zvrk. The pieces in this collection offer comparative and interpretive accounts of the avant-gardes in the former Yugoslavian countries of Croatia, Serbia, and Slovenia. The book is divided into four sections: Art and Politics; Literature; Visual Art and Architecture; and Art in Motion (covering theater, dance, music, film, and video). All of the contributors live in the region and many of them participated in the movements discussed. The book also reprints a selection of the most important manifestos generated by all phases of Yugoslav avant-garde activity.

Pell's equation is part of a central area of algebraic number theory that treats quadratic forms and the structure of the rings of integers in algebraic number fields. It is an ideal topic to lead college students, as well as some talented and motivated high school students, to a better appreciation of the power of mathematical technique. Even at the specific level of quadratic diophantine equations, there are unsolved problems, and the higher degree analogues of Pell's equation, particularly beyond the third, do not appear to have been well studied. In this focused exercise book, the topic is motivated and developed through sections of exercises which will allow the readers to recreate known theory and provide a focus for their algebraic practice. There are several explorations that encourage the reader to embark on their own research. A high school background in mathematics is all that is needed to get into this book, and teachers and others interested in mathematics who do not have (or have forgotten) a background in advanced mathematics may find that it is a suitable vehicle for keeping up an independent interest in the subject.

THE HARD DRIVE BIBLE, EIGHTH EDITION is the definitive reference book for anyone who deals with personal computer data storage devices of any kind. This comprehensive work covers installations, drive parameters, & set up information for thousands of Hard Disk, Optical, DAT Tape, & CD-ROM Drives. A concise history of data storage devices is followed by the most expansive compilation of technical data offered to the public today. Specifications, drawings, charts & photos cover jumper settings, cabling, partitioning & formatting of disk drives. SCSI commands & protocols are addressed, in addition to chapters revealing the intricacies of different interface standards & common troubleshooting procedures. THE HARD DRIVE BIBLE contains the answers to anyone's questions concerning the purchase, installation & use of modern digital data storage devices. The difficulties caused by compatibility mismatches are addressed & solutions are offered. Also featured are controller card information & performance ratings, as well as valuable tips on increasing drive performance & reliability through software. THE HARD DRIVE BIBLE is published by Corporate Systems Center, one of the leaders in the digital storage device field. A CD-ROM included with the book carries CSC's drive performance test software & formatting tools, as well as thousands of drive parameters, specifications, & technical drawings. To order contact: Corporate Systems Center, 1294 Hammerwood Avenue, Sunnyvale, CA 94089; 408-743-8787.

Taichi Hiraga Keaton is an insurance investigator educated in archaeology and trained in SAS survival combat who's about to take on the world, one case at a time! Taichi Hiraga Keaton, the son of a Japanese zoologist and an English noblewoman, is an insurance investigator known for his successful and unorthodox methods of investigation. Educated in archaeology and a former member of the SAS, Master Keaton uses his knowledge and combat training to uncover buried secrets, thwart would-be villains, and pursue the truth... "If you have the willingness to learn, you can learn anywhere." With this message from his old teacher in his heart, Taichi Hiraga Keaton finally lands in Romania, where ruins of the Danube civilization lie. Yet, what awaits Keaton is a major horrifying event that shocks the entire nation!

"Having been born a freeman, and for more than thirty years enjoyed the blessings of liberty in a free State—and having at the end of that time been kidnapped and sold into Slavery, where I remained, until happily rescued in the month of January, 1853, after a bondage of twelve years—it has been suggested that an account of my life and fortunes would not be uninteresting to the public." -an excerpt

Make the most of your trip with the Rough Guide Thai Phrasebook. Find the perfect word or phrase for every situation Use extensive two-way dictionary packed with vocabulary Choose food and drink from any menu Check out travel tips and a regional pronunciation guide Listen to correct pronunciation of essential dialogues DOWNLOAD EASY AUDIOFILES OF CONVERSATIONS FROM www.roughguides.com

Three teenage girls share their stories about life as students, as young women with disabilities, and as minorities in a male-dominated special education school culture.
