Thompson classifies organizations according to their technologies and environments. That organizations must meet and handle uncertainty is central to his thesis. Organizations in Action is firmly grounded in concepts and theories in the social and behavioral sciences. While it does not offer an actual theory of administration, the book successfully extends the scientific base upon which any emerging administrative theory must rest.

Organizations in Action: Social Science Bases of...

Organizations in Action is a classic multidisciplinary study of the behavior of complex organizations as entities. Previous books on the subject focused on the behavior of people in organizational contexts, but this volume considers individual behavior only to the extent that it helps explain the nature of organizations.
