A modern-day quest that echoes the ancient alchemists' work to discover the elixir of life • Provides an overview of alchemical practices in the ancient world--from Europe to China • Reveals the alchemical secrets for creating this elixir in clear scientific language In 1989, while attempting to extract precious minerals from his property, a wealthy Arizonan obtained a mysterious white material that initially defied scientific attempts to identify it. After several years of testing, this substance was revealed to consist of gold and platinum--but in a form unknown to modern science. Further research showed that this powder, which had also been

discovered to possess marvelous healing powers, contained monatomic forms of precious metals whose electron units had been altered to no longer display the physical, chemical, or electrical properties of the original elements. This substance, Robert Cox shows, bears eerie resemblance to the ultimate quest of the alchemists: the elixir of immortality. The mysterious material-spiritual science of alchemy was once pervasive throughout the ancient world, spanning the globe from China and India to Egypt and medieval Europe. In *The Elixir of Immortality*, Robert Cox reviews the alchemical lore of these traditions and the procedures each used to produce this fabulous elixir. Using his own alchemical research, Cox then reveals secrets that have been kept hidden for millennia uncovered in his own modern-day quest to rediscover this

long-sought elixir of life.

In *The Great Pyramid: A Factory for Mono-Atomic Gold*, Cross identifies the purpose of the structure, what it was making, and the significance of this substance. The world is dominated by an all encompassing hierarchical system which is in and of itself involved in a relentless pursuit of money and energy extracted from the masses. So what is money? It can ultimately be traced in root to an element known as gold. It has been this way for thousands of years. So why is gold the chosen foundational token propping up the global economy? This question is examined and answered within this book.

A New York Times Bestseller! From the racetrack to the battlefield—dauntless, fearless, and exemplar of Semper Fi—she was Reckless, "pride of the Marines." A Mongolian mare who was bred to be a racehorse, Ah-Chim-Hai, or Flame-of-the-Morning, belonged to a young boy named Kim-Huk-Moon. In order to pay for a prosthetic leg for his sister, Kim made the difficult decision to sell his beloved companion. Lieutenant Eric Pedersen purchased the bodacious mare and renamed her Reckless, for the Recoilless Rifles Platoon, Anti-Tank Division, of the 5th Marines she'd be joining. The four-legged equine braved minefields and hailing shrapnel to deliver ammunition to her division on the frontlines. In one

day alone, performing fifty-one trips up and down treacherous terrain, covering a distance of over thirty-five miles, and rescuing wounded comrades-in-arms, Reckless demonstrated her steadfast devotion to the Marines who had become her herd. Despite only measuring about thirteen hands high, this pint-sized equine became an American hero. Reckless was awarded two Purple Hearts for her valor and was officially promoted to staff sergeant twice, a distinction never bestowed upon an animal before or since. Author Robin Hutton has reignited excitement about this nearly forgotten legend, realizing the Sgt. Reckless Memorial Monument at the National Museum of the Marine Corps, completed in July 2013, and now spurring the creation of a second memorial at Camp Pendleton, California, where
