Newly updated for 2016, the Minnesota West Metro Area Fishing Map Guide is a thorough, easy-to-use collection of detailed contour lake maps, fish stocking and survey data, and the best fishing spots and tips from area experts. Fishing maps, detailed area road maps and exhaustive fishing information are provided in this handy eBook. Lake maps and detailed fishing information for over 200 lakes from Minneapolis (west of the Mississippi) to Willmar are featured in this volume. Lake Minnetonka, Prior Lake and Medicine lake are just a few of the popular waters covered. Whether you're dodging pleasure boaters while casting bucktails for muskies on Lake Minnetonka, casting jigs for panfish on Lake Waconia or enjoying the Twin Cities skyline while fishing Lake Calhoun, you'll find all the information you need to enjoy a successful day out on the water on one of the area's many excellent fisheries. Know your waters. Catch more fish with the Minnesota West Metro Area Fishing Map Guide.

This volume contains the proceedings of the second working conference on Verified Software: Theories, Tools, and Experiments, VSTTE 2008, held in Toronto, Canada, in October 2008. The 16 papers presented together with 4 invited talks were carefully revised and selected for inclusion in the book. This second conference formally inaugurates the Verified Software Initiative (VSI), a fifteen-year, co-operative, international project directed at the scientific challenges of large-scale software verification. The scope of the cooperative effort includes the sharing and interoperability of tools, the alignment of theory and practice, the identification of challenge problems, the construction of benchmark suites, and the execution of large-scale experiments.

With over 60 per cent of the world's population living in cities, the networks beneath our feet — which keep the cities above moving — are more important than ever before. Yet we never truly see how these amazing feats of engineering work. Just how deep do the tunnels go? Where do the sewers, bunkers and postal trains run? And, how many tunnels are there under our streets? Each featured city presents a "skyline of the underground" through specially commissioned cut-away illustrations and unique cartography. Drawing on geography, cartography and historical oddities, Mark Ovenden explores what our cities look like from the bottom up.
