and recommend it.

Unfortunately his

practically the SAME

extends to the
ridiculous. In Practical

C is a high-level
language. It lets us write

a high-level statement

```
like: area = (base *  
height) / 2.0; /*
```

Compute area of
triangle */. The
compiler will translate
this statement into a
series of cryptic low-
level machine
instructions. This sort of
statement is called an
assignment statement.
