Driving The
Product Lifecycle

Management (PLM) is

an integrated,

information-driven

approach comprised of

people,

processes/practices, and

technology, to all

aspects of a product's

life, from its design

through manufacture,

Access Free Product

deployment and maintenance—culminating in the product's removal from service and final disposal.

Product Lifecycle Management

The core of PLM (product lifecycle management) is the creation and central management of all product data and the

Access Free Product

technology used to access this information and knowledge. PLM as a discipline emerged from tools such as CAD , CAM and PDM , but can be viewed as the integration of these tools with methods, people and the processes through all stages of a product's life. [13]
