In todays globalised world, an understanding of international trade is essential for those studying and practising law, business, banking and finance. International Trade Law offers a comprehensive and informed analysis of the complexities of an international sale transaction through case law, policy documents, legislation, international conventions and rules adopted by international organisations such as the ICC. Focusing on international sales of goods and the various relations that arise as a result of sale contract, this book considers and discusses: Standard trade terms, the Convention on International Sales of Goods 1980 and the UNIDROIT Principles for International Commercial Contracts 2004; Issues relating to E-Commerce including electronic transport documents, especially electronic bills of lading; International transportation of cargo, both unimodal (sea, air, land and rail) and multimodal, the various conventions affecting such transportation and the proposed new convention drafted by UNCITRAL and CMI; Insurance and payment mechanisms, in particular letters of credit and the recently adopted UCP 600; Dispute resolution including issues of jurisdiction, applicable law, arbitration and mediation; Corruption as a major challenge to conducting business and the various anti-corruption conventions, in particular the OECD Anti-Bribery Convention 1997 and the UN Convention Against corruption 2003. Accessible to students encountering this often challenging area of the law for the first time, International Trade Law clarifies a range of topics through Tables and diagrams, and directs the reader to relevant further reading, online resources, and journal articles throughout

The mission of the National Institute of Standards and Technology (NIST) enables NIST to provide broad support for the advancement of U.S. manufacturing. Research and services supporting manufacturing are intended to be an important component in all of the NIST laboratories. Moreover, since manufacturing is a major part of the U.S. economy, the growth or loss of U.S. manufacturing jobs is a very important issue. Clearly, the successful execution of NIST's programs supporting manufacturing will have a significant impact on manufacturing jobs in the United States. With the multidisciplinary, multisector, and crosscutting nature of manufacturing, the Director of NIST requested that the National Research Council (NRC) assess the manufacturing-related programs at NIST in 2012. Accordingly, a panel of experts was convened by the National Research Council to perform the assessment. The Panel on review of the Manufacturing-Related Programs at the national Institute of Standards and Technology visited the NIST campus in Gaithersburg, Maryland, on March 26-28, 2012. A Review of the Manufacturing-related Programs at the National Institute of Standards and Technology: Fiscal Year 2012 contains the results of the panel's assessment. The assessment considered manufacturing research at NIST broadly, with emphasis on the specific advanced manufacturing areas: Nanomanufacturing (including Flexible Electronics); Smart Manufacturing (including Robotics); and Next-Generation Materials Measurements, Modeling, and Simulation. The area of Biomufacturing also reviewed as a subset of the Nanomanufacturing review. As is to be expected for programs covering such wide scope, the boundaries among these broad areas are not rigid and there is some overlap among them. On the basis of its assessment, the panel formed the observations and recommendations which are detailed in this report.

The Internet of Toys (IoToys) is a developing market within our Internet of Things (IoT) ecosystem. This book examines the rise of internet-connected toys and aims to anticipate the opportunities and risks of IoToys before their widespread diffusion. Contributors to this volume each provide a critical analysis of the design, production, regulation, representation and consumption of internet-connected toys. In order to address the theoretical, methodological and policy questions that arise from the study of these new playthings, and contextualise the diverse opportunities and challenges that IoToys pose to educators, families and children themselves, the chapters engage with notions of mediatization, datafication, robotification, connected and post-digital play. This timely engagement with a key transformation in children's play will appeal to all readers interested in understanding the social uses and consequences of IoToys, and primarily to researchers and students in children and media, early childhood studies, media and communications, sociology, education, social psychology, law and design.

Like The Group, Mary McCarthy's classic tale about coming of age in New York, Joanna Smith Rakoff's richly drawn and immensely satisfying first novel details the lives of a group of Oberlin graduates whose ambitions and friendships threaten to unravel as they chase their dreams, shed their youth, and build their lives in Brooklyn during the late 1990s and the turn of the twenty-first century. There's Lil, a would-be scholar whose marriage to an egotistical writer initially brings the group back together (and ultimately drives it apart); Beth, who struggles to let go of her old beau Dave, a onetime piano prodigy trapped by his own insecurity; Emily, an actor perpetually on the verge of success -- and starvation -- who grapples with her jealousy of Tal, whose acting career has taken off. At the center of their orbit is wry, charismatic Sadie Peregrine, who coolly observes her friends' mistakes but can't quite manage to avoid making her own. As they begin their careers, marry, and have children, they must navigate the shifting dynamics of their friendships and of the world around them. Set against the backdrop of the vast economic and political changes of the era -- from the decadent age of dot-com millionaires to the sobering post-September 2001 landscape -- Smith Rakoff's deeply affecting characters and incisive social commentary are reminiscent of the great Victorian novels. This brilliant and ambitious debut captures a generation and heralds the arrival of a bold and important new writer.
