Advanced speaking practice: English Imitation Lesson

"Humanists and social scientists alike will profit from reflection on the efforts of the contributors to reimagine anthropology in terms, not only of methodology, but also of politics, ethics, and historical relevance. Every discipline in the human and social sciences could use such a book."--Hayden White, author of *Metahistory*

"Personal Memoirs of a Residence of Thirty Years with the Indian Tribes on the American Frontiers" by Henry Rowe Schoolcraft. Published by Good Press. Good Press publishes a wide range of titles that encompasses every genre. From well-known classics & literary fiction and non-fiction to forgotten—or yet undiscovered gems—of world literature, we issue the books that need to be read. Each Good Press edition has been meticulously edited and formatted to boost readability for all e-readers and devices. Our goal is to produce eBooks that are user-friendly and accessible to everyone in a high-quality digital format.

This book investigates the concept of what it means to be 'epic' and its form in American life, literature, and art from the country's early days.

Exploring the complex relationship between language and immigration in the United States, this timely book challenges mainstream, historically established assumptions about American citizenship and identity. Set within both a historical and a current political context, this book covers hotly debated topics such as language and ethnicity, the relationship between non-native English and American identity, perceptions and stereotypes related to foreign accents, code-switching, hybrid language forms such as Spanglish, language and the family, and the future of language in America. Work from the fields of linguistics, education policy, history, sociology, and politics are brought together to provide an accessible overview of the key issues. Through specific examples and case studies, immigrant America is presented as a diverse, multilingual, and multidimensional space in which identities are often hybridized and always multifaceted.

ARGUMENT IN COMPOSITION provides access to a wide range of resources that bear on the teaching of writing and argument. The ideas of major theorists of classical and contemporary rhetoric and argument—from Aristotle to Burke, Toulmin, and Perelman—are explained and elaborated, especially as they inform pedagogies of argumentation and composition.

This book describes standards for the English language arts and defines what K-12 students should know about language and be able to do with language. The book presents the current consensus among literacy teachers and researchers about what students should learn in the English language arts—reading, writing, listening, speaking, viewing, and visually representing. The first chapter of the book (Setting Standards in the English Language Arts) addresses defining the standards and the need for standards. The second chapter (Perspectives Informing the English Language Arts Standards) discusses the content, purpose, development, and context of the standards. The third chapter presents the 12 standards in detail. The fourth chapter (Standards in the Classroom) presents elementary, middle-school, and high-school vignettes which illustrate how the standards might be implemented in the classroom. The book concludes that these standards represent not an end but a beginning—a starting point for discussion and action. A glossary (containing more than 100 terms), a list of participants, a history of the standards project, an overview of standards projects, state and international English language arts standards, a 115-item annotated list of resources for teachers, and a comment form are attached. (RS)

The publishing history of the eleven chapters that comprise the contents of this second volume of *Native Languages of the Americas* is rather different from that of the thirteen that appeared in Volume I of this twin set late last year. Original ver sions of five articles, respectively, by Barthel, Grimes, Longacre, Mayers, and Suarez, were first published in Part II of *Current Trends in Linguistics*, Vol. 4, subtitled *Ibero-A merican and Caribbean Linguistics* (1968), having been com missioned by the undersigned in his capacity as editor of the fourteen volume series which was distributed in twenty-one tomes between 1963 and 1976. McClaran's article is reprinted from Part III of Vol. 10. *Linguistics in North America* (1973) and the two by Kaufman and Rensch were in Part I I of Vol. 11, *Diachronic, A real, and Typological Linguistics* (1973 ). There are three contributions by Landar: earlier versions of two appeared in Vol. 10 ("North American Indian Languages. " accompanied by William Sorsby's maps of tribal groups of North and Central America), and in Vol. 13, *Historiography of Linguistics* (1975); however, his checklist of South and Central American Indian languages was freshly compiled for this book. Generous financial support for preparing the materials included in this project came from several agencies of the United States government, to wit: the National Endowment for the Humanities and the National Science Foundation, for Vols. 10 and 13, and the Office of Education, for Vols. 4 and 11; in addition.

Modern theories of meaning usually culminate in a critique of science. This book presents a study of human intelligence beginning with a semantic theory and leading into a critique of music. By implication it sets up a theory of all the arts; the transference of its basic concepts to other arts than music is not developed, but it is sketched, mainly in the chapter on artistic import. Thoughtful readers of the original edition discovered these far-reaching ideas quickly enough as the career of the book shows: it is as applicable to literature, art and music as to the field of philosophy itself. The topics it deals with are many: language, sacrament, myth, music, abstraction, fact, knowledge—to name only the main ones. But through them all goes the principal theme, symbolic transformation as the essential activity of human minds. This central idea, emphasizing as it does the notion of symbolism, brings Mrs. Langer's book into line with the prevailing interest in semantics. All profound issues of our age seem to center around the basic concepts of symbolism and meaning. The formative, creative, articulating power of symbols is the tonic chord which thinkers of all schools and many diverse fields are unmistakably striking; the surprising, far-reaching implications of this new fundamental conception constitute what Mrs. Langer has called philosophy in a new key. Mrs. Langer's book brings the discussion of symbolism into a wider general use than criticism of word meaning. Her volume is vigorous, effective, and well written and will appeal to everyone interested in the contemporary problems of philosophy.
