AS SEEN ON NETFLIX. A classic he-said-she-said romantic comedy, with bonus content including a Q&A with the author. All I've ever wanted is for Juli Baker to leave me alone. For her to back off – you know, just give me some space. Juli has been making Bryce's life hell from the moment they met. All he wants is to live a normal life, without some crazy person mooning after him. The first day I met Bryce Loski, I flipped. Honestly, one look at him and I became a lunatic. It's his eyes. But she doesn't see it that way. In her eyes, they're meant for each other, even though he might not realize it yet. That is, until the eighth grade, when everything flips. And just as Juli starts to realize that Bryce may not be all he seemed, Bryce begins to think that there's more to Juli than meets the eye . . . Wendelin Van Draanen's

Flipped is a modern-day classic about first love and not judging a book by its cover. A romantic comedy-of-errors told in alternating chapters by two fresh, funny voices.

Eugene is remembering the summer of 1938 in Frenchtown, a time when he began to wonder “what I was doing here on the planet Earth.” Here in vibrant, exquisite detail are his lovely mother, his aunts and uncles, cousins and friends, and especially his beloved, enigmatic father. Here, too, is the world of a mill town: the boys swimming in a brook that is red or purple or green, depending on the dyes dumped that day by the comb shop; the visit of the ice man; and the boys’ trips to the cemetery or the forbidden railroad tracks. And here also is a darker world—the mystery of a girl murdered years before. Robert Cormier’s touching, funny, melancholy chronicle of a vanished world celebrates a son’s connection to his father and human relationships that are timeless.

With the view that children are capable young scientists, authors encourage science teaching in ways that nurture students' curiosity about how the natural world works including research-based approaches to support all K-5 children constructing scientific explanations via talk and writing. Grounded in NSF-funded research, this book/DVD provides K-5 teachers with a framework for explanation (Claim, Evidence, Reasoning) that they can use to organize everything from planning to instructional strategies and from scaffolds to assessment. Because the framework addresses not only having students learn scientific explanations but also construct them from evidence and evaluate them, it is considered to build upon the new NRC framework for K-12 science education, the national standards, and reform documents in science education, as well as national standards in literacy around argumentation and persuasion, including the Common Core Standards for English Language Arts (Common Core State Standards Initiative, 2010). The chapters guide teachers step by step through presenting the framework for students, identifying opportunities to incorporate scientific explanation into lessons, providing curricular scaffolds (that fade over time) to support all students including ELLs and students with special needs, developing scientific explanation assessment tasks, and using the information from assessment tasks to inform instruction.

Supplement your language arts block with 180 days of daily spelling and word work practice! This first grade spelling workbook provides teachers with weekly spelling and word study units that are easy to incorporate into the classroom or home. Perfect for after school, intervention, or homework, teachers and parents can help students gain daily practice through these quick activities that correlate to state and national standards. Arranged into weekly units, the worksheets feature fun activities for first grade students such as picture match, tapping sounds, word sorts, analogies, verb tenses, plural practice, sentence completions, synonyms, antonyms, and more! The repetitive structure helps students focus on the words rather than the activities and allows for more independent practice. Provide fun, engaging, and purposeful practice for your students with this must-have student workbook that includes digital materials.

Many of the earliest books, particularly those dating back to the 1900s and before, are now extremely scarce and increasingly expensive. We are republishing these classic works in affordable, high quality, modern editions, using the original text and artwork.

Pa Lia Vang's first day at Jackson Magnet, her new school, isn't going so well. She doesn't know anyone. She can't find her second-grade classroom. And then she gets the only person who's been nice to her into trouble. Will Pa Lia ever fit in? In this first chapter book of the Jackson Friends series, Michelle Edwards explores with humor and sensitivity the anxieties children often face in a new situation.

While challenging the teacher as hero trope, *We Got This* shows how authentically listening to kids is the closest thing to a superpower that we have. Cornelius identifies tools, attributes, and strategies that can augment our listening.

A very messy princess in a very tidy royal family has the opportunity to prove that there are advantages to not being neat.
