Solutions 1.1- 1.4 7 Chapter 1 Pattern Recognition 1.1

Substituting (1.1) into (1.2) and then

differentiating with respect to w_i we obtain $\sum_{j=0}^n w_{jx} \frac{\partial}{\partial w_i} \sum_{n=1}^N x_i = 0$. (1)

Re-arranging terms then gives the required result.

1.4 We are often interested in finding the most probable value for some quantity. In

boring and exposes the reader to details without being terse or dry.

~~Pattern Recognition and Machine Learning by Bishop~~
4 Further Reading. Bishop covers the least squares solution in Section 3.1.1. The equations include a basis function expansion (replacing $\phi(X)$ with $\phi(\Phi)$), and motivates the least squares cost from the log-likelihood of a Gaussian model.. Murphy derives the least squares solution in Chapter 7 slightly more slowly.

Read Book Solution Pattern Recognition And Machine

No previous knowledge of pattern recognition or machine learning concepts is assumed. Familiarity with multivariate calculus and basic linear algebra is required, and some experience in the use of probabilities would be helpful though not essential as the book includes a self-contained introduction to basic probability theory.
