## **Quiz & Worksheet - Characteristics of Special Right ...**

Two very special right triangle relationships will continually appear throughout the study of mathematics: In an isosceles right triangle, the angle measures are  $45^\circ$ - $45^\circ$ - $90^\circ$ , and the side lengths create a ratio where the measure of the hypotenuse is  $\sqrt{2}$

# Get Free Special Right Triangles Worksheet

There are two "special" right triangles that will continually appear throughout your study of mathematics: the  $30^\circ$ - $60^\circ$ - $90^\circ$  triangle and the  $45^\circ$ - $45^\circ$ - $90^\circ$  triangle. The special nature of these triangles is their ability to yield exact answers instead of decimal approximations when dealing with trigonometric functions. This page will deal with the  $45^\circ$ - $45^\circ$ - $90^\circ$  triangle.
