'The human body is a carbon-based, chemically fueled, force-liquid-and-air cooled, bipedal, communicative, photochromatic, binocular, cellularly self-replicating, self-diagnostic, self-repairing tissue-wise, multidexterous, continuously adaptive, computer-controlled, biodegradable exhaust system machine, capable of short and long-term memory with conceptual retrieval and integration, and precise decision-making and creativity—truly the "Ultimate Machine".

~~The ultimate machine — creation.com~~

The human body is a machine that provides us with the ability to move efficiently and effectively. Just as machines are designed to perform a certain amount of work, every human body is designed to perform a certain amount of work that needs to be performed. When we perform work it stresses the body based on the amount of stress imposed upon it.
