In *Mordin On Time*, Nick Mordin sets out his method for answering the most fundamental question facing punters in any race, namely: which is the fastest horse? He was timing the sections of races with a stop watch, estimating wind strength and direction, adjusting for movements of running rails, using projected times and calculating average times years before the best-selling American books on speed rating were published. This new edition incorporates much new material, including standard times for all Irish racecourses (plus the major French ones). *Mordin On Time* enables the reader to construct their own speed ratings wherever they live.

Poems and woodcut prints of birds and other animals by Maine artist and poet Leslie Moore.

Idleness, Indolence and Leisure in English Literature is the first study to provide transhistorical perspectives and cutting-edge critical analyses of debates concerning idleness in English literature. The topicality of the subject is emphasized by two pieces of sociological analysis.

"As novelist and poet Andrei Codrescu points out in the essay that accompanies this selection

of photographs from the Getty Museum's collection, Evans's photographs are the work of an artist whose temperament was distinctly at odds with Beals's impassioned rhetoric. Evans's photographs of Cuba were made by a young, still maturing artist who - as Codrescu argues - was just beginning to combine his early, formalist aesthetic with the social concerns that would figure prominently in his later work."--Jacket.

This book is dedicated to Aristid Lindenmayer on the occasion of his 60th birthday on November 17, 1985. Contributions range from mathematics and theoretical computer science to biology. Aristid Lindenmayer introduced language-theoretic models for developmental biology in 1968. Since then the models have been customarily referred to as L systems. Lindenmayer's invention turned out to be one of the most beautiful examples of interdisciplinary science: work in one area (developmental biology) induces most fruitful ideas in other areas (theory of formal languages and automata, and formal power series). As evident from the articles and references in this book, the interest in L systems is continuously growing. For newcomers the first contact with L systems usually happens via the most basic class of L systems, namely, DOL systems. Here "0" stands for zero context between developing cells. It has been a major typographical problem that printers are unable to distinguish between 0 (zero) and 0 (oh). Thus, DOL was almost always printed with "oh" rather than "zero", and also pronounced that way. However, this misunderstanding turned out to be very fortunate. The wrong spelling "DOL" of "DOL" could be read in the suggestive way: DO L Indeed, hundreds of researchers have followed this suggestion. Some of them appear as contributors to this book. Of the many who could not contribute, we in particular regret the absence of A. Ehrenfeucht,

G. Herman and H.A. Maurer whose influence in the theory of L systems has been most significant.

Notable writers—including UK poet laureate Simon Armitage, Julian Barnes, Margaret MacMillan, and Jenny Uglow—celebrate our fascination with the houses of famous literary figures, artists, composers, and politicians of the past. What can a house tell us about the person who lives there? Do we shape the buildings we live in, or are we formed by the places we call home? And why are we especially fascinated by the houses of the famous and often long-dead? In *Lives of Houses*, notable biographers, historians, critics, and poets explore these questions and more through fascinating essays on the houses of great writers, artists, composers, and politicians of the past. Editors Kate Kennedy and Hermione Lee are joined by wide-ranging contributors, including Simon Armitage, Julian Barnes, David Cannadine, Roy Foster, Alexandra Harris, Daisy Hay, Margaret MacMillan, Alexander Masters, and Jenny Uglow. We encounter W. H. Auden, living in joyful squalor in New York's St. Mark's Place, and W. B. Yeats in his flood-prone tower in the windswept West of Ireland. We meet Benjamin Disraeli, struggling to keep up appearances, and track the lost houses of Virginia Woolf and Elizabeth Bowen. We visit Benjamin Britten in Aldeburgh, England, and Jean Sibelius at Ainola, Finland. But *Lives of Houses* also considers those who are unhoused, unwilling or unable to establish a home—from the bewildered poet John Clare wandering the byways of England to the exiled Zimbabwean writer Dambudzo Marechera living on the streets of London. With more than forty illustrations, *Lives of Houses* illuminates what houses mean to us and how we use them to connect to and think about the past. The result is a fresh and
