For this revision of their bestselling junior- and senior-level text, Guru and Hiziroglu have incorporated eleven years of cutting-edge developments in the field since Electric Machinery and Transformers was first published. Completely re-written, the new Second Edition also incorporatesuggestions from students and instructors who have used the First Edition, making it the best text available for junior- and senior-level courses in electric machines. The new edition features a wealth of new and improved problems and examples, designed to complement the authors' overall goal ofencouraging intuitive reasoning rather than rote memorization of material. Chapter 3, which presents the conversion of energy, now includes: analysis of magnetically coupled coils, induced emf in a coil rotating in a uniform magnetic field, induced emf in a coil rotating in a time-varying magneticfield, and the concept of the revolving field. All problems and examples have been rigorously tested using Mathcad.

This book provides a detailed analysis of absorption refrigeration systems, covering single effect to multi-effect systems and their applications. Both the first and second laws of thermodynamics are discussed in relation to refrigeration systems to show how system performance differs from one law to another. Comparative energy and exergy analyses and assessments of single effect, double effect, triple effect and quadruple effect absorption refrigeration system are performed to illustrate the impact of an increase in the number of effects on system performance. In particular, the second law (exergy) formulation for absorption refrigeration systems, rarely discussed by other works, is covered in detail. Integrated Absorption Refrigeration Systems will help researchers, students and instructors in the formulation of energy and exergy efficiency equations for absorption refrigeration systems.

Beyond Mahathir is a timely response to the planned retirement in October 2003 of Prime Minister Dr. Mahathir Mohamad of Malaysia, and poses vital questions about "Malaysian politics after Mahathir." It examines Malaysia's long-term social transformation, the global disruptions of July 1997 and September 11, 2001, key leaders' calculations of power, and the pitfalls of leadership transition that intersected to produce the political dramas of Mahathir's final decade in power. Organizing arguments around the critical but unstable fortunes of a thirty-year nationalist-capitalist project, it brings to life Mahathir's predicaments, contradictions in Anwar Ibrahim's career, Reformasi's creative dissent, and the cultural imperative behind the Alternative Front's "rainbow coalition". The result is an instructive guide to the momentous events that ultimately revolved around competing conceptions of what the future portends or should portend for Malaysia, and the bitterly contested ways of getting there.
