This book provides students with a thorough theoretical understanding of electromagnetic field equations and it also treats a large number of applications. The text is a comprehensive two-semester textbook. The work treats most topics in two steps – a short, introductory chapter followed by a second chapter with in-depth extensive treatment; between 10 to 30 applications per topic;

examples and exercises throughout the book; experiments, problems and summaries. The new edition includes: modifications to about 30-40% of the end of chapter problems; a new introduction to electromagnetics based on behavior of charges; a new section on units; MATLAB tools for solution of problems and demonstration of subjects; most chapters include a summary. The book is an undergraduate textbook at the Junior level, intended for required classes in electromagnetics. It is written in simple terms with all details of derivations included and all steps in solutions listed. It requires little beyond basic calculus and can be used for self-study. The wealth of examples and alternative explanations makes it very approachable by students. More than 400 examples and exercises, exercising every topic in the book Includes 600 end-of-chapter problems, many of them applications or simplified applications

Discusses the finite element, finite difference and method of moments in a dedicated chapter

PW50 (1981-1983; 1985-1987; 1990-2002), PW80 (1983; 1985; 1991-2002), BW80 (1986-1988; 1990)

Selecting an internship site in recreation and leisure services is one of the most important academic decisions of your college years. A good internship brings academic coursework to life and provides work experience and professional contacts that help to ensure a successful professional career. Your internship is the foundation for your future, and like any strong foundation, its construction requires time, effort, and the proper tools. In *Internships in Recreation and Leisure Services: A Practical Guide for Students, Sixth Edition*, you

will go through a systematic internship selection process that will help you utilize your life experiences and available resources to maximum advantage. The ultimate goal is to help you to identify and secure an internship that not only meets your academic objectives but also enhances your professional career in recreation and leisure services. The purpose of this text is to give you the proper tools for getting the best possible internship the time and effort, however, are up to you.

You will live the rest of your life in the future, so it makes sense to think about it. In this book, we consider the near future and ways that all forms of leisure, particularly sport and tourism, will be affected by accelerating change. This may seem to be a fools errand, but ignoring the possibilities of the future is even more foolish.

Leisure is of central importance in the future -- what will people do when they experience the absence of the necessity of being occupied? What will be worth doing when constraints are minimal? Two forms of leisure will receive special attention. Tourism can be a way of exploring the world and sport a way of exploring within playful rules. Both tourism and sport have emerged as expected parts of life, as huge components of the economy, and as the basis for careers. Some of the readers of this book are planning careers in parks, recreation, tourism, sport, fitness, and other forms of leisure. We discuss important trends and future projections in diverse areas such as population growth, immigration, crowding, climate change, and technology. Each of these factors is important in its own right. However, these forces will interact with one another in ways that are difficult to foresee. So the best that you and your colleagues in

the field of recreation, park, sport, tourism and other leisure services can do is to keep scanning the horizon and to develop a variety of broad scenarios that the interplay of the above forces may create. Strategies and flexible plans for each scenario will have to be constructed, each based upon admittedly inadequate information and major assumptions.

A history of the motorcycle, including special features on sport, racing, touring, customised bikes, landmarks, records, and motorcycles in war and at the movies

Illustrated in full colour throughout, each entry includes a detailed specification table and authoritative performance figures. The line-up features outstanding machines famed for their performance,

technical brilliance and good looks.

For decades the crown jewels of Japan's postwar manufacturing industry, motorcycles remain one of Japan's top exports. Japan's Motorcycle Wars assesses the historical development and societal impact of the motorcycle industry, from the influence of motor sports on vehicle sales in the early 1900s to the postwar developments that led to the massive wave of motorization sweeping the Asia-Pacific region today. Jeffrey Alexander brings a wealth of information to light, providing English translations of transcripts, industry publications, and company histories that have until now been available only in Japanese. By exploring the industry as a whole, he reveals that Japan's motorcycle industry was characterized not by communitarian success but by misplaced

loyalties, technical disasters, and brutal competition.

As one of the leading specialists in hip arthroscopies, Dr. Joseph McCarthy's text promises to become a definitive addition to the field. Featuring full color, arthroscopic views and contributions from prestigious figures in the orthopaedic community, this text covers all the essentials of hip arthroscopy including: examinations, arthroscopic procedures for loose bodies, labral injuries, defects of the femoral head and acetabulum, treatment for infections, tumors, differential diagnosis and, most uniquely, a section on pediatric hip injuries. In addition, it provides surgeons with a detailed analysis of cost considerations and comparison with open hip procedures as well as outcome analysis. A must-have for any orthopaedic surgeon interested in learning the newest procedures in the treatment of hip
