What exactly is it that enables us to live as we do today? Is it that we work harder? Or, that we have more money? The simple truth is that we can live differently from how we lived a hundred years ago and a thousand years ago because of the accumulated sum of new ideas encapsulated in new technology. Money is in this sense only one small part of new technology, the myriad of ideas and inventions that support our way of living today. Why then are most solutions and even problems formulated in terms where "money" is essential? It is because it is the way we have been taught to think. Concepts used in economics, often grossly misinterpreted, have become our prison leading us into a very inhumane world. And we do not even see the prison bars that confines us to certain solutions because we think this is just how it must be. We think it is established science. And because we do not even see the prison bars we become our own wardens. We have

thus been beguiled by economists to think that money is wealth and this creates an inhumane world. Instead we should focus on ideas and our true needs as the source of creating true wealth. But if we are to get away from the present focus on money and speculation to get more money we must change how we think and for that we need new ideas, concepts and models. However, new ways of thinking about economic matters will not come from the economists or the greedy rich. They simply have too much to loose. Economists would loose a lot of prestige or even their jobs and the rich would loose the easy ways they have invented to become rich by creating bubble money. We need new ways of viewing what is true wealth and how such is created. This way, and only this way, can we break free from the prison of economic thoughts that today dominate us. By applying his long experience in modeling the author shows alternate ways of viewing wealth, true

Security – All That Glitters Isn't Gold ” is a back to basics, easy to use guide to reassert financial control and secure your financial future. book distributed in high schools, colleges (law schools particularly—some lawyers are not great when it comes to financial matters), vocational schools, and the like. I hope you're aiming to reach the masses with this one—the subject matter is so salient right now, and this information is really resonating with people. Jennifer Manganello, Esq., University of California, Hastings College of the Law I just finished reading your book. Outstanding! I love the unique way it was written in PowerPoint format—original, straightforward, and easy to follow. The information the book contains, and how it is explained, makes it stand out. You do not allow the reader to blame others or make excuses about their financial situation. You tell them to look in the mirror, take responsibility, and you show them that money problems are not hopeless but fixable. The stock and real estate investing sections are informative and easy to understand. You take the

complexity out of stock market investing. You show real estate investors the pitfalls to avoid. Readers will especially benefit from how you compare and contrast real estate investing with the stock market and other investments — bonds, precious metals and cash. It's evident the book was written from firsthand experience, making it truly authentic. I am impressed both by your credentials and your experience counseling over 2,000 homeowners in financial distress since 2007. This book cuts to the core of what people need to know and do to put their financial house in order. I highly recommend your book! Read it and you will substantially increase your financial I.Q.
