Axel may not be an honorable man, but he has his limits. Except Libby won't take no for an answer. She's determined to have someone show her what she's been missing, and suddenly, Axel can't bear to think of Libby playing doctor with anyone else. . . USA Today Bestselling Author Erin McCarthy The Lady of the Lake Pro baseball player Dylan Diaz is pretty sure he's going to hell. When you rescue a drowning woman from a lake your first thought should be, "Are you okay?" not, "Can I make mad, passionate love to you?" But the minute sputtering kindergarten teacher Violet Caruthers is on Dylan's boat, that's all he can think about. Maybe it's the potent combo of a nun's personality inside a stripper's body. Maybe it's the way

There is widespread agreement that certain non-Creole language varieties are structurally quite different from the European languages out of which they grew; however, until recently, linguists have found difficulty in accounting for either their genesis or their synchronic structure. This 2003 study argues that the transmission of source languages from native to non-native speakers led to 'partial restructuring', whereby some of the source languages'

morphosyntax was retained, but a significant number of substrate and interlanguage features were also introduced. Comparing languages such as African-American English, Afrikaans and Brazilian Vernacular Portuguese, John Holm identifies the linguistic processes that lead to partial restructuring, bringing into focus a key span on the continuum of contact-induced language change which has not previously been analysed.

Informed by the first systematic comparison of the social and linguistic facts in the development of these languages, this book will be welcomed by students of contact linguistics, sociolinguistics and anthropology.

The aim of the atlas is to provide images of taphonomic modifications, making it as comprehensive as possible with evidence presently available. This volume is intended both as a field guide for identifying taphonomic modifications in the field, and for use in the laboratory when collections of fossils are being analyzed. Images in the book are a combination of scanning electron micrographs, regular photographs, cross-sections of bones and line drawings and graphs. By providing good quality illustrations of taphonomic modifications, with links between similar types of modification, the atlas provides a reference source for identifying the agents responsible for the

modifications, the processes by which they were formed, and the potential bias introduced by the processes. The authors also aim to emphasize on the directions they consider taphonomic studies should be headed. Firstly, we should seek to quantify the degree of bias introduced into a fossil fauna and to take account of this bias before interpreting the palaeoecology of the fossil site. Secondly, we should recognize that taphonomic modifications increase the information encoded in fossils by identifying perimortem and postmortem contexts. This provides a more dynamic and realistic view of the past.
